## RENT INCREASES IN AMERICA LAID TO SPECULATION

Mr. Hartman Says Zoning Has Shown Better Record Than Housing Laws

SOCIAL WORKERS ASK AID OF CIVIC GROUPS

Cleveland Sessions Emphasize Need of Strong Organization for Effective Work

CLEVELAND, O., May 27 (Special) Diminishing size and increased ren-tals of American apartments are due to "turning over to private specula-tion the only commodity without which we cannot live."

This declaration was made to the

National Conference on Social Work here by Edward T. Hartman, state consultant on housing and planning, Massachusetts Department of Public Welfare. His topic was, "What Zon-ing Is Doing to Improve Housing Conditions."

Zoning Paves New Way

Mr. Hartman said in part:
"Zoning is doing more to lay a
foundation for improved housing
conditions than anything we ever have developed. Housing laws aimed at improving tenement living and failed, and they considered almost not at all the homes of the people, as distinguished from tenements.

"Zoning laws have a new accom plishment to their credit. They recognize the existence of the one and two-family house. They provide for a coverage of the lot of often 25 per cent for a one-family house, 30 per cent for a two-family house, and provide front yards, often of 25 feet in depth; side yards of 7½ to 10 feet

or more, and generous rear yards.
"That this movement is spreading may be evidenced from Massachusetts, where there are 91 planning boards and where 617-10 per cent of the people live under zoning.

"Zoning, thus, has established standards that mean something.

"Our planning and zoning movements are promising to get us somewhere along the line of human progress. Their utilimate fruition will depend upon all of us. If we more and more work on constructive lines nning and zoning and many other eful things may be brought to ultion, with benefit to humanity."

Need of Strong Nucleus Need for a strong nucleus of or-ganizations for social work and a more diffused leadership in the smaller groups, was emphasized by Miss Gertrude Valle, president of the nterence. Following the opening sion, the 3000 delegates divided to 12 sections to hear lectures and Dringers Louise Factor.

## FRANCE JOYFUL AT SURRENDER OF ABD-EL-KRIM

Regarded as Happiest Event Since 1918 Armistice-Riff Leader's Future

By SISLEY HUDDLESTON By Special Cable

PARIS, May 27-The happiest eyent since the 1918 armistice is how the dramatic surrender of Abd-el-Krim is described in France. Unquestionably the cessation of the Riff war which may now be expected means the disappearance of one of the darkest clouds which has hung above France. Since the latest correspondence between Abd-el-Krim and Jules Steeg, the French President, has not been disclosed, it is suggested in some quarters that in reality it contained the intimation that Abd-el-Krim was ready to abandon the struggle in order to save the country from a long and merci-less guerrilla warfare.

Under French Protection Whether M. Steeg's reply was encouraging is not revealed, and indeed such comment as is made in critical newspapers such as Humanité is largely speculative. The supreme fact is that Abd-el-Krim has placed himself, his family and property unconditionally under the proection of France, and was conducted with due honors to Taza and afterward will proceed to Fez. At the same time he surrendered the French and Spanish prisoners. It is announced that whatever be

the faults of Abd-el-Krim, he can count on French generosity. The tradition of behaving chivalrously toward a fallen enemy will be ob-served. He will probably be exiled years of rebellion, and it would appear that the Riffian chief missed a great opportunity at Oudida where he could have obtained far better

in other respects. They are a part of city planning and they are emphasizand by the community, the house, the factory, but we have no planned communities. We are just beginning to plan them.

## ELECTORAL BILL VETOED; UNFAIR SAYS GOVERNOR

Struggle to Pass Measure Over the Veto Is Expected to Follow

REPUBLICAN LEADERS ARE GIVEN SETBACK

Mr. Fuller Had Urged Changes and Explains Not Enough Had Been Made

Governor Fuller today vetoed the bill redrawing Massachusetts electoral district lines, on the grounds that many of the newly organized districts furnish unfair and unconstitutional representation

The veto is regarded on Beacon Hill as one of the most sensational and important events of the session, and is expected to precipitate the most intense struggle of the year, since the bill had the strong support of most of the Republican leaders in the Legislature. Whether sentiment of the House and Senate is such as to override the veto and pass the bill is regarded as uncertain today. Democratic strength in the House, joined with the Governor's supporters there, is believed by many to be sufficient to prevent

the two-thirds majority necessary to pass the bill over a veto. Passage of a "joint order" by both branches is believed by some to be a possibility. If a joint order were passed, it would not go to the Governor at all. Passage of such an order is a legislative rarity, may apply only to a few measures, and is regarded as a rebuke. It requires only a majority vote.

Bill Drawn in 1925

The redistricting bill was drawn by a recess committee composed in 1925 of powerful Republican leaders in both branches of the Legislature, and strong Republican sentiment has thus far favored the measure. It is one of the most important bills of the season, since it redivides elec-toral districts within the State, in Amounts which Massachusetts towns and cities will receive this accordance with a provision of the year from the state income tax were Constitution which requires that

such be done every 10 years. On May 24, after weeks of conference and discussion, Governor Fuller sent a letter to both branches of the General Court, in which he urged them to alter the redistricting bill so that districts would be nearer to the average size of 35,000 voters, and so that several cities would be intact and not split. Yesterday the bill was finally enacted, and only a few of the Governor's recommenda-

were followed. Explains His Action

mates for other cities are: Fall River, \$412,600; Haverhill In his veto message today, the \$148,508; Holyoke, \$214,308; Brockton, \$194,350; Cambridge, \$369,142; Governor says in part: "On May 24, in response to a request made by the presiding officers Lawrence, \$297,070; Lowell, \$210,of both branches of the General 900; Lynn, \$259,633; Worcester, \$631,309; Newton, \$272,524. The town of Brookline will receive \$301,-Court. I made in writing certain 663, under the estimate.
Notice is given cities and towns copy of which is attached hereto and made a part of this veto mes-

plished The money will be turned over or "I also advanced the proposition redited to the cities and towns in that wherever it was reasonably and legally possible cities approximating voters as found by the special committee on redistricting should be

neither added to nor divided. "Since the President of the Senate and the Speaker of the House of Representatives received this letter, this redistricting bill has been en-NEW YORK, May 27-America's acted in both branches and has been rubber supply will continue to be presented to me for my signature.

PROTEST OVERRULED

Income Levy Rate Upheld by State Board of Appeals

The income tax rate on national banks and trust companies in Massachusetts shall be 6 per cent, according to a decision announced by the State Board of Tax Appeal, upholding the figure previously set by Henry F. Long, Tax Commissioner. The board was acting on the ap-

peal which several banking associations brought. At a recent hearing the appellants alleged that the rate should be 5.56 per cent. The decision says:
"We find that it was the intent of

the Legislature that the fixing of this rate should be on a basis of fact and should not depend on arbi- year from June 26 to July 3." trary action either by the commissioner or by this board. "We believe the controlling fact

in fixing the maximum rate to be charged the banks was intended to be the average of the tax paid by period of three years. Figures to offered in evidence by the appellants, nor were they available from the reports of the Commissioner of Corporations and Taxation

"The board has therefore voted to dismiss this appeal and sustain the rate of 6 per cent determined by the commissioner for the year 1926, without prejudice as to the evidence to be introduced in case there are appeals from rates determined in fu-

The report is signed by William S oungman, state treasurer; Daniel C. Denniston, deputy auditor; and Eugene B. Fraser, executive coun

#### No Hicksville Change in Name, Voters Decide

HICKSVILLE, N. Y., May 27 (AP) -Hicksville, L. I., will remain Hicksville, despite jokesters' shafts and the efforts of some of the residents to have the name of the town

Nine hundred and ninety-four citizens voted to retain the name given the town in honor of Elias Hicks, a Quaker, who did much for the anti slavery movement. Only 315 ballots

favoring a change were cast.

The total vote was 1345, which was very close to the vote of the town at last presidential election. There were four blank votes, one was spoiled and 29 were voided.

## CHURCH CALLED TO TRAIN YOUTH

Unitarian Sessions Stress Need of Leadership in Religious Education

Religious education as a guiding factor in character development and the importance of religious worship were discussed at the annual meeting of the Unitarian Sunday School Society at Unity House today.

"The step from the church school session to the church service of worship will be a natural step if services of worship are made an essential part of the religious training of youth," said Mrs. Isabel K. Whiting of the Kings Chapel Church school "I believe that the apparent dis-regard of our youth of today of moral restraint and older ethical codes is

due not to a weaker moral sense but to a tack of leadership." College Missions Planned

Miss Sara Comins, executive secretary of the Young People's Religious Union, announced today at the an-nual meeting of that organization that Unitarian missions among students of colleges and universities in the United States and Canada are being planned. "The Student Federaof Religious Liberals has disbanded," she continued, "but the Young People's Religious Union is taking up the work anew and will hold a conference for students this

The Rev. George L. Parker, president-elect of the Unitarian Sunday School Society, also stressed the importance of religious education. He is minister of the Newton Center Unitarian Church, and succeeds as business corporations taken over a president of the Sunday School Society Arthur E. ## Make Your Money Work for You

MANY people who invest in securities often find it diffi-cult or inconvenient promptly to reinvest the income from their securities.

You can either immediately deposit your interest or dividend check in this Bank, when received; remembering that deposits made on or before the third business day of any month, earn interest from the first of that month, if they remain in the Bank until the end of the quarterly interest

If you carry a savings account here, the interest on your account will be credited every three months, i. e., the first day of July, October, January and April. In this way your interest is automatically reinvested and immediately begins earning additional interest.

Deposits made now will draw interest from June 1st

## ANGLO-AMERICAN AMITY VOICED

Sympathetic Speeches Made at Reunion of British War Missions to America

By Cable from Monitor Bureau LONDON, May 27 - Recalling Samuel Johnson's words that "man should keep his friendship in con-stant repair" the Marquess of Reading, presiding at a dinner last right at the seventh annual reunion of the British War Missions to the United States, declared that the friendship between the two nations was not a matter that could be left to itself, but should be continually cultivated. The ex-Viceroy of India, describing

his first visit to the United States on the war loan mission, referred to

the bankers as "soft-spoken, well-bred gentlemen," and praised Ameri-

can journalists for "faithfully keep-

ing their word" with him on the con-

fidential views with which he had "We are proud of America's achievements," he said and hoped "the people of the United States might find some reason at times to be proud of England, for after all, the character that made them on both sides of the Atlantic sprang

from the same roots.' The annual report of the executive committee showed special attention was being given to young Britons by lecturers at boys' and girls' schools and other organizations in the British Isles to promote friendly Anglo-American relations. Felicitous messages approving the efforts of the British war missions in this direction were read from the King, President

British and American Delegates Pleased at Work of Disarmament Conference

great sincerity.
The commission adjourned yesterday, turning over a mass of technical questions to subcommittees, and probably will resume its work some

Viscount Cecil, for one, does not consider that a separate naval agreement, as suggested by Japanese diplomats, is an impossibility. Before departing for England, he told the correspondents that it might well appear during the progress of the preparatory work at Geneva that it would be possible to treat special ses of disarmament apart. He

up other negotiations.

He emphasized, however, that it would not be desirable to arrange any conference that might seem to compete with the Geneva meeting. His idea was that any naval negotiations should dovetail into the main effort which is now being under-taken by the preparatory commission.

by the Versailles Treaty to organize a defense against attack by airplane.

"We can understand the desire of

ain and Japan will materialize. Their of transforming our industrial equiphope, of course, is that France and Italy will join in a naval conference which should not be permitted to em-barrass Geneva's centralized struggle against competitive armaments.

'We are only at the beginning of our studies into this complex prob-lem," Mr. Gibson said. "The Amer-ican delegation believes, however, that land, naval and air problems can be handled separately, although it doesn't necessarily mean separate district conferences. We must wait form of warfare and urged the world form of warfare and urged the wo to see the best way of treating the details, and we will know more when the experts have rendered their decision on the various technical questions which have been put to them."

Studies to Be Carried Through Mr. Gibson added that the American delegation was determined to see the Geneva studies carried through

Viscount Cecil roughly predicted that a general disarmament conference was not likely before the end of 1927. He warned that although satsfactory progress had been made at the negotiations had not Geneva; the negotiations had not reached a point where a disarmament eme for the entire world could established. He counseled palence and making haste slowly.
The former allied nations saw in

the memorandum by Hungary a move to make a bold attempt to revise the

The preparatory commission for the disarmament conference started at Geneva on May 18 with a pro-gram which included propossis to be submitted to the Council of the

Opposing Viewpoints At the opening session there was an overwhelming opinion expressed by many of the delegates for disamment but with an accompanying skepticism regarding its methods and possibilities.

The United States, Great Britain,

and Germany appeared favorable to concentrating discussion on limstable tangible armaments, while on other hand, France, Belgium and Italy expressed reluctance, believing that they might be conquered at some time by actually weaker but potentially stronger nations. The feeling of the Italian Premier,

Arrived Under Her Own Power-See Her in the Central Court

Seven years experience with this type of boat is back of the JW38. From this experience we know it will meet the requirements of yachtsmen for Northern and Southern waters, in all seasons and all weather, for day runs and extended cruises. It may be operated by any man or woman who drives a car. It provides, for 6 or 8 people, a degree of home comfort seldom achieved in a boat of this size. It is seaworthy, safe and comfortable, and we believe will add impetus to the present rapid development of motor boating as one of the most popular of all outdoor sports. Designed by a nationally known naval architect, it is built exclusively for Wanamaker's by the American Car

& Foundry Company, under the personal supervision of Captain Moe, our Marine Expert.

The following specifications quickly reveal the sound construction and cenvenient general plan:

The JW 38 is a 38 foot trunk cabin cruiser, with a 6 cylinder 100 horsepower Hall-Scott marine engine, capable of developing 15 to 16 miles an hour. The engine, rudder and all other cruising controls come di-rectly to the steering gear, giving the helmsman complete control of the boat at all times. The forward part of the cockpit is protected on three sides with plate glass wind and weather shields. The after-deck is a luxurious, breeze-swept lounge large

enough for dancing or loafing in an environment of beauty, comfort and happiness. An awning of heavy khaki, fitted with storm curtains, gives snug protection to passengers on deck in heavy weather.

A hand rail about the entire boat and a wide side deck provide easy and safe passage from stern to bow, to handle ground tackle, or to ride in the teeth of the wind.

Going below for the first time one glances with a thrill of delight about the living quarters. One large divided cabin, in ivory enamel and mahogany. Six comfortable berths, with springs and Kapok mattresses. A dining or game table.

A galley where meals are prepared while cruising. Complete with sink, icebox, lockers and two-burner stove.

towel bar, mirror, soap-dish holder, linen dtawers, lockers, shelves, etc. All finished in spotless washable, white enamel. Large jump-sash windows and ingeniously arranged portholes give the maximum of ventilation and view. Screens keep insects outside while at anchor near woods.

There are scores of other specifi-

Afloat at Wilmington, Delaware

qualities of the boat. Many are features found on no other boat of this

size and price.

The JW 38 is really a home on the waters, complete even to electric lights. A cruising vacation There need be no hotel reservations or baggage transfers. No

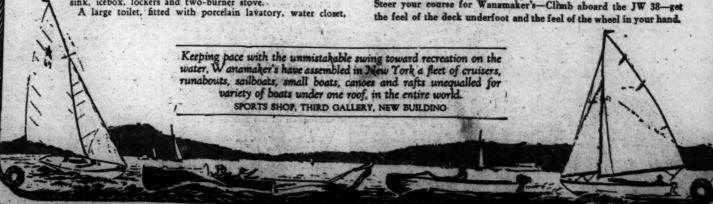

eations that quickly reveal to the experienced yachtsman the seaworthy

otel bills. No restaurant expense.

But best of all—and what the layman wants to know—you may

operate the JW 38 from the beginning with less trouble than a motor car, at equal or lower cost for your recreation. No license is needed. We take care of Federal Registration. The boat is placed in the water at Wilmington, Delaware, ready for you to take the wheel and weigh anchor for wherever fancy leads you—alone or with a happy party.

## COUNCIL HOPES TO AID INDUSTRY

John S. Lawrence Talks at essential to strengthening our posi-Dinner of New Hampshire Civic Association

MANCHESTER, N. H., May 27-Aid to New England industries in finding ways to improve their competitive position is the purpose to which the research committee of the New England Council is directing president of the organization, in an address last night at the annual dinner of the New Hampshire Civic

"It is to be expected," said Mr. Lawrence, in speaking of the survey that is under way, "that some dis-agreeable truths will be encountered. If we did not believe that there are some conditions in New England's mic situation that could be improved, the council would not have been created. We must be prepared to hear some voices raised in protest when such conditions are dis-covered and made known. To expect otherwise would be to assume that the millennium has arrived. The question is, then, how shall we meet such a situation, if it arises, and how shall we justify, if called upon do so, calling attention to facts which may not be pleasing to some of us?

'It is the interest of the New England community that the council day, June 2, the graduating class of must serve if it is to be helpful to the New England Conservatory of

well as to those who happen to be the owners of such an industry. "It is this community interest that

the council represents, and which its research committee hopes to serve. The committee must, there fore, seek to bring out the facts mos ing so it will have the support not only of the council, but of all who stand for development and progress in New England."

Other speakers were Gov. John G. Winan; and William S. Rossiter of Concord, chairman of the New Hampshire branch of the council.

#### YALE APPOINTS DIRECTOR OF PLAYS

NEW HAVEN, Conn., May 27 (A)-Edgar M. Wooley, Yale 1911, who has directed several plays produced by the Yale Dramatic Association, has accepted a university appointment for 1926 and 1927. He will have the title of director of undergraduate production, the rank of assistant pro-fessor and will be assigned to the English department for work as assistant in dramatic courses.

Mr. Wooley is directing the coming production of the "Oresteia" of Æschylus, the commencement play of the Yale Dramatic Association.

#### CONSERVATORY LISTS GRADUATION PROGRAM

Beginning with the senior-junior reception in Recital Hall on Wednes-day, June 2, the graduating class of "For this reason, any industry that gives evidence of any diminution of Conservatory Alumni Association at pupils."

MANY TEACHERS

Summer Session Courses Are Scheduled for High School Instructors

All natural science subjects taught in junior and senior high schools will be included in the courses for teachers in the summer sessions at Massachusetts Institute of Technology this year, it was announced today. The summer session, for which teachers from all parts of the United States and Canada are enrolling, will open on July 6, in most subjects, and will continue for

four weeks. The course in methods of teaching high school mathematics, which is under the direction of Walter F. Downey, head master of the English High School of Boston, will cover junior and high school subjects and classroom problems of both.

The fundamentals of the modern

theory of electrons will be presented by Prof. M. Knobel of the Institute, who will handle the subject from a non-mathematical viewpoint with experimental evidence on which the theories are based.

Joseph R. Lunt, head of the nat-

ural science department of the Mechanic Arts High School, Boston, will instruct in methods of teaching general science in high schools, a course which will discuss the sub-New England. their early days.

Harriet Treadwell '27, East Williston, L. I., was in charge of frolic plans, and Dorothy Shaw '27, Portsplans, and Dorothy '27, Portsplans, and Dorothy '27, Portsplans, and Dorothy '27, Portsplans, and Dorothy '27, Portsplans present and one of the features of the England Firemen's Association annual muster on Salem Common on July 10. It will be the windup of a week's program of attractions in commemoration of the three hundredth anniversary of the city.

A feature in conjunction with the muster will be the exhibit of the Old Union hand engine, the oldest type of fire engine in the United States. Salem has the distinction of owning the engine and it is at present at the Essex Institute, an institution which contains historic articles and records of all description.

The Old Union was purchased in London in 1749 and is built with solid block wheels. Unlike the later type of hand engines, it had to be filled with buckets of water and then pumped through a small hose. In 1866 the city of Salem presented this old fire engine to the William Penn Company of Philadelphia, but a few years ago it was brought back to Salem. It is about four feet high and five feet long. The engine will be a feature of the muster parade.

## RATE EQUALITY ON GRAIN HOPED

Spokesmen of New England Confident I. C. C. Will Grant Section's Appeal

Special from Monitor Bureau WASHINGTON, May 27-Hope is high among spokesmen for Boston and New England seaports at the Interstate Commerce Commission hearing on the grain differential case, that freight rates on export grain from the West sent to North Atlantic ports will be reduced with conseit impetus to the prosperity of

us grain and we will build up the port of Boston," was the essence of statements of concluding witnesses called by the Maritime Asciation, Boston Chamber of Com-erce. Evidence showed strikingly the fundamental importance of bulk grain cargoes to the prosperity of Boston. One witness declared the whole commerce of the port de-

pends on grain.

Without it, it was said repeatedly, cargo ships cannot be brought to port and without cargo ships manufactured goods made locally in New England cannot be exported from Boston direct. As a Boston manufacturers are for Saturday. Automobile trips are sending goods to New York for ex-

Trade Handicap Shown With capacity to handle 40,000,000 bushels of export grain last year, C. W. Boynton, foreign freight agent of the Boston & Maine Railroad, stated that Boston handled only 5,000,000 bushels. For this the freight

favor of Baltimore, Philadelphia and Norfolk is blamed. These ports have a present rate advantage over Boston of about half a cent per 100 pounds for ex-lake grain. The Boston freight rate on this grain is the same as that of this grain is the same as that of New York. Counsel for the New England rates be made similar One of these was uncovered yester-

#### Harmonica Playing to End Music Fete

Former Boston 'Newsie,' Now Widely Known, Will Be Program's Feature

Vorrah Minevitch, who is known America for his playing of the harmonica, formerly a newsboy on the streets of Boston, has been invited to Boston for the harmonica demonstration to be held at the State House next Saturday morning at 10:30 as the closing event of Boston's third Civic Music Festival. Governor Fuller is to address the boys among the listeners.

Albert N. Hoxie, director of the harmonica movement in Philadephia, which now numbers 50,000 boys in its ranks, also is to be here, as will his assistant, Fred Sonnen, teacher of harmonica. Both Mr. Hoxie and Mr. Sonnen last winter were in Boston, with them the Boys' Harmonica Band of Philadelphia.

They came at the request of Mrs. William Arms Fisher, executive chairman of the festival, to show Boston what can be done with har-monicas and organizing harmonica clubs. Many are familiar with the playing of Mr. Minevitch from the programs he gives over the radio.

#### OREGON DRAFTS BILL

FOR REFORESTATION PORTLAND, Ore.. May 20 (Special Correspondence)—The reforestation commission appointed by the last Legislature has tentatively drafted a bill to make possible the growing of timber at a legitimate profit by landowning individuals on some of the 2,265,000 acres of stumpage land in Oregon. The bill has figures based on a 41/2 per cent return to the timber grower on his investment, insurance, protection and taxation costs while his timber crop matures.

## STATE LAWAIMED AT DRY SUPPORT

But Legislative Leaders Feel Agents Need No Federal Authority

Efforts to introduce into the Masachusetts Legislature a bill prohibiting state or local police from acting as federal prohibition officers, sponsored by James T. Welch, Democratic Representative from North Adams, were characterized as futile and unnecessary by legislative leaders today, because it is contended that local officers in Massachusetts have much more power than federal agents. The bill was referred to the next annual session.

The bill was intended to block any attempt to carry out in Masachusetts the policy inaugurated in California which local police, county and state officers, were made federal en-forcement agents. State officers said today, however, that it is unlikely any such efforts will be made in Massachusetts, since the powers and functions of state police, in particular, are said to exceed greatly those of federal men.

The bill, which was filed last night provides that:

"No constable and no city marshal, chief of police, or member of the po-lice department of a county, city or town, or of a fire or water district. shall accept appointment as or receive compensation as, or perform any of the duties of a federal prohibition enforcement officer or official. Whoever violates any provision of this section shall thereupon cease to be a constable, city marshal, chief of police, police officer, or member of the police department as the case "No officer or member of the state

police shall receive compensation as, or perform any of the duties of a Federal prohibition enforcement officer or official. Whoever violates any provision of this section shall be immediately discharged from office.' It was pointed out at the State House that one purpose and effect of the act might come in case the Massachusetts enforcement act were repealed, when it would become necessary for federal officers to bear the whole burden of prohibition forcement. In that case, it might be

## Lowest Prices at Which We Have Ever Sold Rugs of This Type!

# Genuine Iran Rugs

(Old Persian Types)

At \$39.75

Sizes 6 to 71/2 ft. long-4 to 5 ft. wide

TRAN is the old name for Persia, and only the old types of Persian rugs are properly called Irans. Even in the old days, when they were not so difficult to find, they sold at \$65 to \$75 and more for these sizes.

In a previous sale of Iran rugs we put a number of the rugs in one of our display windows -and one man bought the entire lot. All during the day, in fact, almost as fast as we replaced a "sold" rug. another customer would claim the new one.

No two of the rugs are alike-they are all beautiful, and purely Persian in design and coloring.

AN EXCEPTIONAL opportunity for collec-tors—and for many people who have longed for a Persian Rug-

Our announcement of the arrival of the first shipment of these rugs, a little over a year ago, came as a real sensation. A sale of genuine Irans, in any such number, is indeed a rare occasion. Except for a scattered few, these rugs had almost gone off the marketsome of our oldest rug men had not seen such a collection as this for twenty-five years or more.

Our connections in the leading rug centers—our reputation as importers and large sellers of foreign rugs-brought the prize to our hands.

There are 97 rugs in the lot at \$39.75. It is not likely that we can again obtain such a collection of genuine Irans to sell at such

This lot also includes exceptional values in Kazaks, Ghenges and other prized Orientals.

Distribution of Population Considered—May Fill in the Jersey Meadows

Special from Monitor Bureau NEW YORK, May 27-A coherent regional plan to arrange transportation facilities and factory and residential zones so as to distribute the population of New York City evenly over Manhattan and the surrounding communities, calling for an expenditure by all the governmental units regional plan of New York City and its environs, according to an an-nouncement, and will be ready for presentation within two years.

The announcement was made by Thomas Adams, general director of the regional plan organization, at a meeting of about 500 men and women interested officially or un-officially in the work, held at the Town Hall, at which the speakers, besides Mr. Adams, included J. Smith, president of the Board of Commerce and Navigation of the State of New Jersey and president of the American Association of Port Authorities, and Edward M Bassett, counsel for the regional plan committee

New bridges across the rivers on both sides of Manhattan Island, new tunnels under them, new rapid transit lines, traffic highways and new streets, built according to a scheme that will look to the orderly development of the whole area, were envisaged by Mr. Adams as re-quisites if all parts of the area af-fected are to contribute fairly and benefit equally from the steady increase in population expected in and around Greater New York.

New Jersey Meadow Fill-in Reclamation of the 13,500 acres of Hackensack meadows and marsh land in New Jersey, across the Hud-son River from New York, was urged by Mr. Smith as one of the steps that could be taken to provide both factory sites and homes for the necessary workers within access of the section.

The land could be filled in so that it would no longer be affected as now by the ocean tides, he said, and could easily be made to ac-commodate one-story buildings for manufacturing and housing. The ashes and refuse from New York City that is now towed out to sea, he said, could be used to splendid advantage if dumped on these mead-

"Chicago," he said, "is built on just such land as this. No doubt, in time these meadows will be built up as

## GAZETTE HELPS RUSSIAN FARMER

Circulation Over 1,000,000 -Letters Classified, and Writers Assisted

MOSCOW, May 5 (Special Correspondence)—Moscow's Bolshoi Theater, regular home of the Russian opera and occasional meeting place of large Soviet and trade-union congresses, witnessed an unusual type of celebration recently. The Krestyanskaya Gazeta, or Peasants' Gazette, probably the only paper of its kind in the world, was giving an entertainment in honor of the fact that its circulation had reached the 1,000,000 mark. 000 mark.

President Kalinin, himself a typi-cal peasant figure, with his shrewd, wrinkled face and straw-colored lit-tle beard, was on the stage to offer the beard, was on the stage to oner the greetings of the Government to the newspaper; and there was a large element of peasants, some of them marked, by their long beards and homespun clothes, in the audience which crowded the theater, listened respectfully to the speeches and took obvious and almost naive delight in the unusual city entertainment that was provided for them

The entertainment helped to focus public attention on the very important rôle which the Krestyanskaya Gazet plays in establishing closer relations between the Soviet Government and the peasants. One hears a good deal about the necessity of ween city and village in Russia; and netimes talk on this subject considerably exceeds performance. But the Krestyanskaya Gazeta, under the able and intelligent editorship of Yakov Yakovlev, has become a big pop-ular organ among the peasants, as its figure of a million subscribers

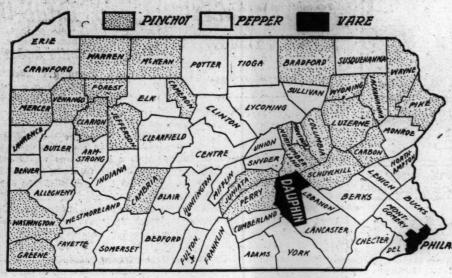

600 letters a month. Some of these cost of organization of emergency his journey back to Italy. A sea-are written by its large staff of more landing places. or less trained "syelkors," or village respondents: others come from he masses of the peasants.

Letters Investigated To print all these letters would require a journal of encyclopædic proportions; and the Krestyanskaya Gazeta appears only once a week in a rather small size. At the most it can only use in full or in part a hundred letters in each issue. But the other letters are not left unused or unanswered. The paper employs a large staff to sort out and classify the letters, which are then turned over to the proper authorities. If there is a question about land distribution the opinion of a legal expert on agrarian legislation is invoked. If a peasant accuses the local authorities of graft or maladministration, the Commissariat for International Affairs is asked to look into the matter. Technical agricultural questions are turned over to the Land Commissariat—and so on down the line.

As a result of this policy the peasants have come to regard the Krestyanskaya Gazeta as their own forum, and the editor of the newspaper, Mr. Yakovlev, testified that the peasant opinions, formulated in these letters, were of great assistance to the Soviet Government in traming its decisions on the new marriage law, on the question of turning over certain state forests To print all these letters would

Resolutions Adopted for Deportation of Law-Breaking Immigrants-General Federation Meeting Hears of Closer Ties With Foreign Women's Clubs

By a Staff Correspondent ATLANTIC CITY, N. J., May 27— ports brought by foreign delegates from China, Australia, and Euroliens, extension of citizenship teachin the schools, and deportation of law-breaking immigrants have en adopted by the General Federation of Women's Clubs, in convention

An amendment to the charter intended to make the declared purpose of the federation conform more closely to its present program was also approved, with only four nega-

The charter, which was signed by President McKinley as his last offi-cial act, specified the object of the 'culture" in various fields, and to bring women's clubs throughout the world into communication with each other.

Restatement of Objects Officers of the federation believe the restatement of the objects which was approved today will make its charter accord more closely to the

work for world peace, education, and public welfare which comprises the present program. The amendment states that "the object of this organization shall be to promote projects for the betterment of humanity and to take concerted Clubs is the desire of women for in-action to that end."

federation also formally approved the recommendations of Mrs. Sherman's biennial report.

Mr. Green on Child Labor

Appealing to members of the fed-eration as "ardent champions of the cause of humanity," William Green, president of the American Federation of Labor, asked their increased efforts to bring about speedy ratificaion of the child labor amendment.

Over 2,000,000 child wage-earners of home-making was outlined in Mrs. are now competing with adults in of home-making was outlined in Mrs. industry, he said, and a federal Sherman's report on the home equipment of the said. ent to establish a minimum standard for child protection is because of the present patch-work legislation with which and plans are on foot for an equally the states are attempting to meet the

"The products of child labor are sold on the open market. The manufacturers of this country whose products compete with those made by convicts, are persistently demanding that laws be enacted prohibiting convicts from making goods to be placed on the market. It is strange, indeed, that these same em- try, second, to arouse them to the ployers' associations, chambers of erce and employers of labor, ment, and third, to supply invaluable fighting federal legislation statistics for the use of the Governwhich will take children out of the ment and all organizations interested workshops and factories and simultaneously they are fighting against the introduction of prison-made

goods upon the market. Competition of Child Labor

"Where the sale of convict-made goods has been prohibited the chief reason for such action was the fact that the labor of the convict displaced the labor of the free worker. In like manner the labor of the child displaces the labor of the adult wage earner.

That majority of American homes "are as poorly equipped for business as an office would be without telephones, typewriters or desks," is shown by the General Federation of Women's Clubs' survey of the home equipment, according shop was a century behind in its to Mrs. Maggie W. Barry of Texas, chairman of the federation's departas a matter of course that she should ment of the American home.

Mrs. Barry's statement, based on lamps for lighting, while the farm reports from an investigation which has already covered more than 4,000,electricity.
"We hear many complaints from 000 homes, bears directly on the chief subject under consideration in the the farmer that his dollar is shrinkbiennial convention of the federaing; so is his wife's. But her dollar tion, in session here.

League of Nations Issue

Realization that the federation must sooner or later face the question of its stand on the League of Nations was forced upon delegates used in city homes. in greetings from two past presidents, Mrs. Percy V. Pennybacker and Mrs. Thomas G. Winter, which plainly indicated their desire for the dederation to support the League as an instrument for world peace.

Having achieved the main objective of its international relations program of the last two years, when the Senate passed the World Court resoturers of home equipment have not put their product within the means of the average family? Or is it unlution, will a similar campaign by the federation for entrance of the United States into the League of Nations be the next step?

Can federation members divorce their stand on the League from partisan politics, considering it solely on its merits as an instrument of peace? These are the questions being asked by leaders in the federation's peace program. The answer will probably not be made until a future convention, but the issue has been squarely raised, in the first business sessions of the biennial.

Literature on the League of Nations is prominently displayed in the exhibit of the International Relations Department, with Mrs. Winter in charge of the booth, and hundreds of League bulletins and articles are being distributed among the delegates.

"Without a Dissenting Vote"

Station, Texas, chairman of the "Have we not, as a matter of history, adopted all these resolutions without a dissenting vote and therehome equipment survey, will plan a program to remedy deficiencies in as unquestionably in favor of strict prohibition? Should we say we have We know from this survey that the done all that could reasonably be exmajority of homes are as poorly pected of us? Or is there something equipped for business as an office would be without telephone, typemore we should do?

"Yes. The whole question of law observance is on trial now, with a disregard for the prohibition law engendering a disregard for other

laws. I would not insult your intelligence by assuming that you would believe such an anomalous proposition. But since the time of Adam we have been prone to seek ome alibi for our transgressions and lay upon the law itself the respon-

sibility for our transgressing." Declaring that the highly organized opposition to the Eighteenth Amendment and the enforcement laws makes it necessary for the federation of women's clubs to give concen-trated attention to the prohibition law in its campaign for law observance, Mrs. White called upon the delegates to again declare their unqualified support of the prohibition law and to use every instrument in their power to make their demand for its strict enforcement effective.

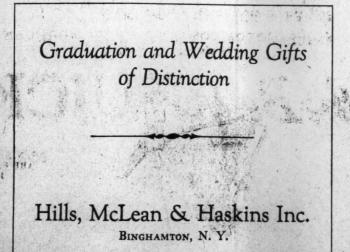

She put the issue squarely before them with the unequivocal declaration that, "We have come to the place where we must definitely enlist "The first step is to make women or compulsory, or face defeat in such

"Help to make this crime dis reputable, help to make it unfashion able, call it by its right name, re-fuse to be smirched by any connec-tion with it," she appealed.

Mrs. White's report also described progress in the nation-wide survey of all criminal courts, instituted by ivision, and which is resulting in a highly valuable record of county and state courts. These records. Mrs. White said, will be of inestimable benefit in the campaign to "put the force in enforcement and the punish in punishment."

#### WOMEN PLANT TREES TO HONOR CLUB HEADS

SPRINGFIELD, O., May 20 (Special Correspondence) - Commendation of the planting of 15 red oak trees, forming a presidents' grove at Bryan Park in honor of 15 past presidents of the Ohio Federation of Women's Clubs, during the recent annual convention here, came to the organzation in a telegram from Charles Lathrop Pack, president of the American Tree Association. This planting was the first of its kind ever held by the federation and is in keeping with the tree conservation program being sponsored by the organization

At the close of each president's term, a tree will be planted in her honor, with her name and date of service on a bronze plate on a small boulder in front of the tree. The federation will immediately steps for the proper legislation to protect trees along public highways and has indorsed a resolution that any trimming of such trees be under the direction of the State forester.

CONTROL OF BAGDAD RAILWAY

STYLED OF VITAL IMPORTANCE

Turks Claim Treaty Right to Transport Unlimited Troops
Over Syrian Section—British Government

Intervenes in Matter

Operatives every three days from Buffalo for the scenic trip through the Juniata and Octoraro.

The season on the lakes has been delayed this year by ice, which did not go out as early as is customary. The grain and ore boats have started from the head of the lakes but are said to have encountered ice on parts of their trips.

Grain Moving Fast

CONSTANTINOPLE, May 4 (Special Correspondence)—The Bagdad Railway, which has been constructed as far as Nissibin, is of vital importance in Near Eastern politics because it is the only Turkish rail-because it i Railway, which has been constructed french position in Syria as far as Nissibin, is of vital importance in Near Eastern politics on the other hand, the French Govportance in Near Eastern politics because it is the only Turkish railbecture on the Bardad Railway as a way which approaches Mosul vilayet, control of the Bardad Railway as a Fort William, Ont., (where the Canadian Pacific delivers to the lake the control of the Bardad Railway as a search of the Bardad Railway as a sea and the Turkish general staff would means of pressure against the Britwant to control this line before undertaking any extensive operation in the Mosul region.

The Mosul region is to receive favors elsewhere, and it has threatened several times to turn the railway over to the Turks.

When Franklin-Bouillon and Mustapha Kemal made the famous Angora accord in October, 1921, which mounted to a separate treaty of eace between the two countries, and agreed in one clause that "the peace between the two countries, they agreed in one clause that "the Turkish Government would have the right to transport troops" over the saw are over Mosul and the French in an awkward position, however, and that is why they may be willing to get rid of it. If there is a war over Mosul and the French right to transport troops" over the Syrian section of the railway. This clause was never interpreted, and when the Turkish general staff demanded permission to send unlimited troops into the vicinity of the Mosul frontier last spring to crush the Kurdish insurrection, the British Government intervened at Paris, and the French Government only gave permission for 25,000 troops to pass, although actually 35,000 passed.

A Military Parade The British Government believed that the Turks were using the Kurdish rebellion as a pretext to concen-trate troops near Mosul, but as far as that was concerned the Turkish staff was only making a military parade to show its strength.

Since then the French and Turks have been quarreling over the interpretation of the Angora accord, as the latter demand the right to send an unlimited number of troops over the Syrian section of the line, and for time and again there with the any purpose they choose. The French said they would only pass troops to be used for internal purposes, and only a limited number of these. The French have given formal assurances to the British Constanting the said the British Constanting to the said the to the British Government at various times that they would not allow any Turkish troops to pass through Syria during a Mosul crisis, and it is very understand him perfectly.

## GREAT BATTLE IS EXPECTED FOR COLLEGE TRACK TITLE

Five Colleges Figured as Leading Candidates for I. A. A. A. A. Outdoor Team Championship Which Starts in Harvard Stadium Tomorrow-New Records Expected

INTERCOLLEGIATE A. A. A. A.

CHAMPIONS

Fear Winner

176—Princeton

178—Columbia

179—Columbia

179—

\*Harvard's cup. †Yale's cup. ‡Cornell's

With 32 colleges represented, and or beindividual and team championship titles of the Intercollegiate Association of Amateur Athletes of America will get under way tomorrow afternoon in the Harvard Stadium. It is the fiftieth championship meet of the association, and a special program has been arranged for Saturday afternoon, beginning at two o'clock.

The three California teams, which have created so much interest in recent I. A. A. A. A. meets, are already here, and the remaining out-of-town contesting teams are due to arrive today, spending the night before the some 860 athletes entered, the battle for the individual and team championday, spending the night before the opening day of trials in quiet. A few may arrive early enough to take limbering exercises on the Stadium cinders late this afternoon.

Five colleges loom up as possible winners of the team championship

winners of the team championship title and the battle between them promises to be very close. University of Southern California, the present title holder; University of California, 27, Sanford; W. W. Hill '26 and F. R. Carren, 27, California, are good for title holder; University of California, holder of the championship in 1921.
1922, and 1923; Leland Stanford University, holder of the Pacific Coast Conference title this spring, but never a winner of the I. A. A. A. A. title; Yale University, which last won the title in 1924, and Harvard University, which was last victorious way back in 1909, are the five leading candi-

record-breakers. Capt. C. F. Gates '26. Princeton, won last year and should repeat if able to compete. L. G. Taylor arready pretty close to the world's marks, it is expected that one or two of the present marks are due to be replaced. Conditions being right, it is practically certain that the pole vault mark of 13ft. 1in., made by Robert A. Gardner of Yale in 1912, as well as the javelin throw of 19ft. 1in., made by C. H. Storrs, also of Yale, in 1923, will go, while there are possibilities of new marks in the running high jump, 16-pound shotput, discus throw and two-nule win Recevils in the ether warst.

and I. D. D'Aiuto '26, West Virginia, all sound 10s. men.

The 220-yard dash will see four of the five point-winners of 1925 again competing. Captain Russell of Cornell, won the title last year and will defend. Captain Norton of Yale, finished second, V. W. Asher '26 of Georgetown, was fourth and Captain Barber of California, fifth. If all of the 1925 winners are to repeat they will have to ners are to repeat, they will have to show their best form as newcomers who are sure to press them are Miller of Harvard; R. B. Clark '26S of Yale; E. L. House, J. B. Parsons '28 and Bruce Smith '28 of Southern California, Bartholomew of Pennsylvania State and E. W. Goodwillie '27 of Corpell Fach of these swiptors con

nell. Each of these sprinters can better 22s, when at his best. The runner who captures the 440-yard dash should have to better 49s., as there are several entered in tomor row's trials who have done that tip s spring. Asher, Georgetown; H. C. ulsen '278 Yale, and Oliver Proudlock '26, Syracuse, finished third, fourth and fifth last year, being the only point-winners carrying over in this event. They will find it difficult keeping their 1925 places with such stars as T. F. Miller '27, L. T. Babcock' '27 and W. G. Storie '26 of Stanford; F. P. Kane '26, Harvard, and C. G. Cook '27, Syracuse, trying to capture the title.

With four of the entrants in th With four of the entrants in the \$80-yard run able to do better than 1m. 54s., the race for the title is going to be a hard one. Capt. W. H. Richardson '26, Stanford; J. N. Watters '26, Harvard; Capt. G. J. Lenness '26, Massachusetts Institute of Technology and Capt. J. J. Campbell '26, Columbia, are the four athletes referred to. Watters wan the title in 1824 and week. ters won the title in 1924 and was fourth last year, while Lenness was second in 1925 and Campbell fifth. Others who are little behind the leaders are Pincus Sober '26, College of the City of New York; C. B. Hogan '26, Yale, and P. M. Nierebach '26, Southern Collegants

California.

With all five of the place winners With all five of the place winners in 1925 again entered for the one-mile run, it is going to be interesting to see how many will withstand the efforts to displace them. E. C. Haggerty '27, Harvard; John Theobald '26, Columbia; W. T. Gegan '26, Georgetown; J. H. Stewart '27, Pennsylvania State and T. J. Cavanaugh '26, Boston College, is the order in which they finished last year. That they will not all repeat is pretty certain as J. N. Watters '26 and Capt. W. L. Tibbetts '26, both of Harvard, should they run in this event as seems likely; C. J. Sansone '28, Colby; L. E. Schwobeda '27, California; B. P. Lewis '27, Swarthmore, and K. H. Auer '27, Dartmouth, must be figured in the running for places.

All 1925 Winners Back Again

All 1925 Winners Back Again All of the two-mile point-winners of 1925 are also back and Captain Tibbetts of Harvard, the present champion, is a decided favorite to repeat and possibly break the record of om. 22 2-5s., made by I. C. Dresser, Coreal, in 1913. Tibbetts is capable

are other good entrants. Seven of the 10 hurdles who placed Seven of the 10 hurdles who placed in the 120-yard high and 220-yard low in 1925 are back again and it looks as if they would come pretty close to repeating. L. W. Dye '26, and K. D. Grumbles '26, both of Southern California, winners of first places in those events, are picked to repeat with Capt. R. E. Wolfe '26, Pennsylvania, their most serious rival. Last year Wolf was second in the high and fifth in the low. R. E. Stever '26 and C. F. Reynolds '28 of Southern California, are good for 15s., or better, while other fast high burdless are J. P. Murphy fast high hurdiers are J. P. Murphy '26, Boston College; E. M. Wells '28, Dartmouth; Capt. C. H. Moore '26, Pennsylvania State and W. S. Edwards '23, Yale. In the low hurdles there are also R. G. Haas '26, Georgetown; C. C. West '27, Stanford; L. H. Enos '27, California, and H. G. Steinbrenner '27, Massachuseits Institute of Tech-

It is hardly expected that a six-foot It is hardly expected that a six-foot jump will place in the high jump as D. L. King '27, Stanford; T. A. Work '27, Stanford; O. L. Hamilton '27, California; H. J. Coggshall '28, Southern California; J. H. Moody '28, Dartmouth and H. D. Casson '26, Pennsylvania, have done better than that O. A. Kendall '27, Bowdoin; G. P. Deacon '278, Yale and L. M. Firey '28 and J. W. Thompson '28 of Princeton, are expected to force the others to their best in order to win.

Lack Star Broad Jumpers

Lack Star Broad Jumpers Last year it took a leap of 23 fee or better to place in the running broad

the contestants.

The pole vault promises to furnish

lete expected to show up well in the event is J. W. Hoffman '27, Stanford. Hammer Mark Safe The 16-pound hammer is lacking in record-breakers. Capt. C. F. Gates '26,

C. H. Storrs, also of Yale, in 1923, will go, while there are possibilities of new marks in the running high jump, 16-pound shotput, discus throw and two-mile run. Records in the other events seem absolutely safe.

In the 100-yard dash there will be only one of last year's point-winners to her than ever to keep among the place-winners with such stars as J. W. Hoffman '27, Stanford; Gerken, California and T. W. Drews '27, Prince-

only one of last year's point-winners

—Capt. B. M. Norton '26 of Yale who was second. The competition in the event will be high grade, however, with A. H. Miller '27, Harvard; Capt. P. S. Barber '26, California, and D. M. Charles '28, Colgate, doing 9 4-5s., consistently, and Capt. H. A. Russell '26, Cornell; E. L. House '28 and Herschel Smith '27, Southern California; R. H. Bartholomew '28, Pennsylvania State and I. INDIANS' BALLY FALLS SHORT

## JONES EASILY BEATS HARRIS

his tee shot went into a bunker, from which he recovered in fine style, but he required three putts. The cards for the first nine holes:

Club, 1 up.
Guilford's defeat left only three
members of the American Walker Cup
team in the running—R. T. Jones Jr.,
Jess W. Sweetser and Watts Gunn. The three won their matches in the

this afternoon's play, numbered 16.
The three surviving Americans will not be called upon to meet each other until the semifical terrories and each is in a different quarter of the draw, Watts Gunn, in the top quarter, J. W. Sweetser in the second and R. T. Jones Jr. in the third.

the eighth, he won four straight holes to square the match at the twelfth, mostly through the Englishman's bad play. They went to the eighteenth all pay. They went to the eighteenth an square. Guilford had trouble in the bunkers, but Bristowe was on in 2 and took two putts to win. The cards:
Bristowe, out.. 5 4 4 3 5 3 4 5 6—39
Guilford, out.. 5 4 4 4 5 5 5 6 5—43
Bristowe, in ... 6 5 5 3 4 4 4 5 4—40—79

Sweetser deserved his victory over MacCormack. His short game was at its best, but he also had an occasional bit of good fortune. Both had perfect 4s for the first three holes. The American took the lead on the short fourth, which requires the most accurate tee shot, but the Irishman's ball went into

quired seven, strokes on this hole, but even with that had a fine aggregate for the nine of 39.

Freshening landward winds rendered the judgment of long shots difficult. Jones was getting plenty of distance, as usual, but was often off the fair-way. He was in very little actual trouble, however avenue on the fifth way. He was in very little actual trouble, however, except on the fifth, where his tee shots came to rest in the bottom of a bunker, only a foot from its steep face. He made a beautiful recovery, and was down in par 5. The cards:

with his second and missing a two-yard putt for a half.

Noon missed a four-footer for a half at the short seventh. The eighth was halved in perfect 4s. On the ninth Gunn was bunkered with his second shot, but got the ball out and on to the green with his third. Then he lost the hole by taking three putts, which greatly displeased him, and he seri-ously replayed in practice all the three putts he had missed.

putts he had missed. On the homeward route, Gunn won the tenth when his opponent had trouble in the bunkers. He also took the twelfth with a fine 3, but lost the fifteenth when his ball went into a trap. The cards:

The young Georgian's golf pleased the gallery immensely, but it did not seem to please him. He continually remarked to his friends that he was not hitting the ball satisfactorly, but nobody semed to agree with him, particularly his opponent.

Robert Scott Jr., defeated the Hon. Michael Scott 2 and 1, and will come against Jess W. Sweetser tomorrow for the right to enter the semifinals.

for the right to enter the semifinals. SOUTHERN ASSOCIATION

Any Swimmer

Get One Idea

—and ought to get many ideas from this authoritative volume. "The Outline of Swimming." by Coach William Bachrach of the Illinois Athletic Club. There are hundreds of ideas packed into the 224 pages of this encyclopedia of the water sport by the world's greatest coach. But if you get only one idea from Coach Bachrach's entire volume, in which secrets of the world's champion swimmers are exposed, it will prove worth to you many times the \$3.00 it costs.

Champions Had to Learn

Even the greatest swimmers once faced some of the difficulties which now baffle you. John Weissmuller, Sybil Bauer, Robert Skelton, Ethel Lackie, and many others were helped to break through these barriers to world renown by the coaching of William Bachrach. He now offers the same instruction to you in book form.

Methods Offered You

From the pictures, diagrams and drawings, numbering 125, you will adopt many of Coach Bachrach's methods to improve your style. From the forty chapters of text comprising the five divisions of the book, you can mine ideas of infinite variety. Every one of them alone, separately, will be worth to you many times the \$3.40 cost of this book.

"The Outline

of Swimming"

By WILLIAM BACHRACH, I.A.C.

Formerly \$5.00

Bargain at \$3.00

Valuable chapters are grouped by Coach Bachrach under each of the following suggestive section headings:

I. Inspirational Stories Told About Bachrach and His Swimmers,

II. How the Beginner May Learn to Become at Home in the Water.

III. Mechanical Secrets Revealed in Five Styles of Speed Swimming

IV. How the Talented Youth Is Developed for Record Breaking.

V. Controversial Questions in Swimming and Life Saving Cleared Up.

If you can make one idea from this great wealth of fascinating in-spirational and technical knowl-edge revealed by Coach Bachrach worth more than the price of the book to you, we would be glad to mail "The Outline of Swimming" to your home, all charges paid, on re-ceipt of your \$3.00 check or money order.

MIDLAND-CHICAGO SERVICE 73 W. Monroe Street, Chicago, Ill

NINE WINS, 10 TO 6

"Winning a pennant on heavy present the three leading hitters in hitting I think is possible provided a the league are New York men. At any rate, the tremendous hitting of the ago and with only two players on the club finishing with a batting average of over .300.

"Our club is one of the heaviest-hitting organizations in the history of heaviest formula on the performance.

hitting organizations in the mances baseball figuring on its performances The three won their matches in the morning by wide margins. Grant A. Peacock, another American, was eliminated by W. Brownlow.

Harris Defeats Pugh

Robert Harris came through his morning round against R. Segar Pugh successfully.

The field, as narrowed down for this afternoon's play numbered 15.

The three surviving Americans will not be called upon to meet each other until the semifinal tomorrow afternoon, as each is in a different quarter of the draw, Watts Gunn, in the top quarter. J. W. Sweetser in the second and R. T. Jones Jr. in the third.

The morning matches were played in fine weather, such as the Americans have enjoyed all week, but which the natives termed sultry. Landward winds entirely changed the nature of the course, as "Bobby" Jones found when he had difficulty in keeping his drives down the middle.

Guilford's passing was marked by weird golf. His long game was not up to its usual standard. Four down at the eighth, he won four straight holes to square the match at the tyelf the saugust the match at the tyelf the square the match at the tyelf the saugust the match at the tyelf the saugust the match at the tyelf the square the match at the tyelf the saugust the match at the saugust the match at the semifinal average is much to ask for, especially when we go up against midseason pitching."

So far as hitting home runs are concerned, however, there is absolutely not expect that the Yankees will fall down. Home-run hitting is far from a novelty for Huggin's teams, In 1915, the Yankees cannot to the front as a home-run hitting club and ever since that year have led the American League clubs in home-run hitting each season with the exception of three will be a saugust the match at the years. In 1918 they finished second; in 1922, third, and last year were tied with St. Louis for first. A record of the home-run hitting the season with the exception of three will be a subject to a subject that the Yankees as home-run hitting is far from a novelty for Huggin's teams. In 1915, the Yankees cannot the front as a home-run hitting is far from a novelty for Huggin's teams. In 1915, the Yankees cannot the front as a home-run hitting club and ever since that year have led the American the four the fo standing in comparison with other clubs follows:

With 38 already to their credit and

the season only one quarter completed, the Yankees should not only lead all clubs in home-run hitting, but should

#### SYLVESTER WINNER OF TWO NAVY PRIZES

ANNAPOLIS, Md., May 27 (A)—
Three United States Naval Academy
varsity athletes have won coveted
scholastic prizes of the 1926 graduating class and one of them, John Sylvester, crewman, has battened down
the hatches over two separate awards.
Sylvester, whose home is in Wells. Sylvester, whose home is in Wells-ton, O., will receive the class of 1871 sword for excellence in practical and theoretical ordnance and gunnery and the Thompson prize, a navigating sextant for excellence in practical and theoretical navigation. Royce N. Flipping of Somerset, Ky., member of the varsity football, basketball and lacrosse teams and Charles H. Lyman 3d of Newport, R. I., will receive com-mendatory letters.

## WILLIAMS WINS TENNIS FINALS

Marsh Takes Singles and, With Baker, the N. E. I. L. T. A. Doubles Honors

tightened his game and won the sec-ond set at 6—4. The next set went to deuce. Baker finally winning 7—5. This left Marsh with the task of taking the next two sets in order to win the match, which he did at 6-1, 6-4 Marsh is a great deal lighter than Baker, who puts a lot of power behind his strokes, but the winner stayed with him to the last. It was the best singles

final in the New England intercol-legiates in years. Baker won almost as many games as did Marsh, being one behind, 22 to 23. Then Marsh and Baker teamed up against the Dartmouth College pair in the doubles—Melvin H. Partridge '27 and Kier M. Boyd '26—and played through another five-set match. The Williams team won at 4-6, 6-3, 2-6 6-2, 6-2, with the fortunes of the

battle changing hands until the last battle changing hands until the last two sets.

By winning the singles and doubles, Williams College takes the lead in points for the eight-point trophy, having 4½. Massachusetts Institute of Technology has 2½, and Dartmouth College 2. The summary:

ples more space on the page. However, almost all newspapers in Japan have a few columns printed in kana, so that those not familiar with the Chinese may read the important

news items. If one learns Japanese he can read the newspapers in China, provided he has learned the characters, but he cannot make himself understood in China. For the character, although meaning exactly the same in either country, has a very different pro-nunciation. One may enter a shop in either land and know from price tags the cost of an article. But having studied counting in Japan he can hold no conversation with the Chinese merchant, and vice versa.

Romaji Society and Typewriting There is today a large group of Japanese business men and others in Japan who advocate the use of the Romaji, as they call the Roman letters, in the written Japanese language. They call themselves the Romaji Society. Every word in Japanese can be written in the letters of the English alphabet. Those com-mercial houses which now make use of the typewriter are already doing that very thing. When writing longhand a brush and India ink are required if one follows custom, but with a pen or pencil one can write the Japanese for "two cents" as "ni sen" in the Roman letters, taking no more time than to scrawl it off in Chinese characters with the brush. Many Japanese dictionaries are published in Romail, the equivalents in kana and Chinese ideographs following each word in lighter type.

If Japan adopts Romaji, the study of the langauge will be greatly sim-plified. And the saving of time spent in learning the characters will be tremendous to the average man or woman who does not care to delve into the intricacies of classical Chi-

#### BRAZIL DEFENDS ITS ATTITUDE ON LEAGUE

RIO DE JANEIRO, May 3 (Special Correspondence)-In his message to the National Congress, which has just opened a new session, President Arthur Bernardes reviews at some length the political and economical happenings of the past year, drawing special attention to the improved condition of the national budget. He points out that, following a series of years which have steadily shown a deficit between receipts and expenditure, the year 1925 closed with a small credit

In dealing with Brazil's foreign policy, the President refers to the recent meeting of the League of Nations, and after relating the facts, now so well known, relative to the Geneva meeting, states that, in maintaining the attitude which it adopted at that gathering, Brazil acted in defense of the League itits actions were subjugated to secret pacts between individual nations.

WOMAN BANKER ELECTED

PORTLAND, Oregon, May 20 (Special Correspondence)—Miss Emma Christman, of the Northwestern National Bank of Portland, chosen a member of the board of governors of the Portland chapter of the American Institute of Banking, is the first man ever elevated to such a position in the history of the chapter.

## Chicago Architectural League

RANCE and the middle West join hands in the current show of the Chicago Architectural style of the Chicago campus. League Exhibition, May 1 to 31. A the Chicago Art Institute is devoted to the work of Prof. Jacques Carlu, winner of the Prix de Rome in 1919, now head of the department of architectural design at Massachusetts Institute of Technology sachusetts Institute of Technology The rest is hung chiefly with the work of Chicago architects. While the absence of eastern men is regretted, the exposition offers interesting examples of architectural progress in the middle West. Of especial interest is an exhibit of re-cent work of Howard Van Doren Shaw, awarded the gold medal of honor of the American Institute of

Architects this year. "The skyscraper is redeeming the failure the architects of the last ration made of it." commented T. E. Tallmadge, F. A. I. A., who has written the foreword to the exhibition catalogue. This exhibit shows the adapted Gothic in the Tribune Tower and the McKinlock campus buildings of Northwestern University. The latter, designed by James Gamble Rogers and Childs & Smith, associate architects, is interesting for the grouping of buildings of different heights into a unified

Eliel Saarinen

Among the younger architects, the influence of Eliel Saarinen, who competed unsuccessfully for the Tribune Tower award, appears stronger than that of the winning competitor. Notable among the work of the younger group is that of Fred Ahlson, recipient of the \$1000 traveling scholarship prize of the Chicago Ar-chitects' Club. His plan for a building of great height consists of a broad base of many regular stories from which rises a tower-like struc-ture, receding by six steps to a lofty height. The whole is a building of unusually restful proportions.

In the architectural school ex-hibits this year, the schools repre-

sented are Armour Institute of Tech-nology, the Harvard School of Architecture, Massachusetts Institute of Technology and the University of Illinois. Massachusetts Institute has confined its display to the work of its Chicago students.

The trend toward simplicity in

residential architecture is noticeable. Suburban houses shown here have solidity and sincerity of oldworld provincial styles, expressed in the new-world manner and adapted to new-world needs. Among the exhibitors are Huszagh & Hill, Russell S. Walcott, Howard Shaw, Thomas Harlan Ellett and S. S. Beman. Diminutive house models are an attractive variation from photographs in this exhibition

By RALPH FLINT

fashion their models, and by combin-ing variously tinted sheets with metals and wood they achieve forms of surprising beauty and originality. They aim at the dissociation of the idea of volume from the idea of compact mass, and give, as it were, the abstraction of the visual image in terms of its internal construction.

Depth, not mass, constitutes to these innovators a real spatial ele-

ment, and so in constructing a torse of interlocking planes in the transparent celluloid they arrive at fig-ures of tremendous strength and vitality. At first glance these airy armatures may appear unwarranted and trivial, but once the aim of these Russian constructionists is glimpsed they take on a quite unsuspected charm and significance. Constructions

Gabo goes in for high reliefs, while Pevsner sets his figures against colored backgrounds. One of the most interesting models presented is Gabo's project for a tower of light, to be erected in some city square and to A Study of Practical be made of glass and metal. Crowning the structure is an arching band of metal which would be realized in the finished fountain in the new mercury tubes, now so much in vogue for night advertising; while up through

"Realistic Manifes.o" accompanying their exhibtion: "We reject the thousand-year-old mistake that the static element in art is the only one. We insist that motion is a new element in art as a kneynote to the real expression of the present." In an industrial age such as the present, where more and more the elements of motion are entering into the every-

PHILADELPHIA, May 24 (Special son was the hearing of the new plano Correspondence)—The season of the Philadelphia Orchestra just closed presented a number of works new to the American public. The composition which caused the greatest proof to the front and the parents' apartment occupying the space to the left of the entrance, which opens glance just how effective and helpful directly through to the garden. This form, almost invariably followed, instrument which extends materially the resources of the present instrution which caused the greatest ment. The new piano, it must be constituted in the form and the parents' apartment occupying the space to the left of the entrance, which opens glance just how effective and helpful directly through to the garden. This form, almost invariably followed, insured quiet and seclusion as well as the protection which was necessary in the days of early settlement.

The Case Address was built made. surance helps them to bring out whatever individuality they may possess to a marked degree. Good taste and smartness of appearance are two erty of the Southwest Museum and it is planned to furnish it after the work of the Parsons pupils and their designs based on study of objects in the Metropolitan Museum not only show appreciation of beauty of color and form but ability to apply these gleanings to modern requirements.

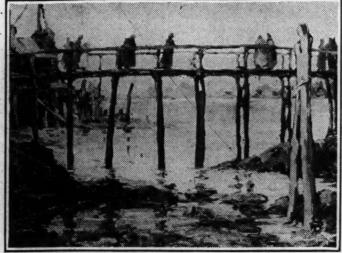

Among the last few exhibitions of the season is the group of Spanish paintings by Alfonso Grosso now on view at the new Ehrich Galleries This young Sevillian painter sets forth the charm of native city in colorful views of its streets and patios, festivals and citizenry. This is his first New York appearance. C. O. Woodbury is at the Weyhe Gallery with etchings, woodcuts, litho-graphs, in which he is seen in a reaching up by slow degrees from the

are so installed. The Babcock group runs from Blakelock, Inness, and in such men as William J. Potter, John Alger, and Victor Charreton. New York, May 25 | keeping his early regard for concise The Harlow Galleries have brought out new etchings by Marguerite

Pictorial Composition

Practical Pictorial Composition, by E. G. Lutz. New York: Charles Scribner's Sons. \$2.

The one who has a desire to look
The accompanying illustration represents "Bridge—After Rain," painted night advertising; while up through the various planes and projections would be filtered shafts of light, bathing the whole thing in modulated effulgence, and turning the entire fabric of the fountain into a quivering body of fiame. In the figure work there is a broad hint of the cubistic painters of a decade ago, but with those early ideas of cubes and angles finally set down in a medium highly suitable.

The one who has a desire to look at pictures with ease must undersome about pictorial composition. For it is in the physical arrangements of masses and forms that the artist achieves a unified note, a single fluent expression. E. G. Lutz has made clear a series of essentials that underlie highly suitable. the fundamentals of pictorial composition in this little volume that has just been published. He has reduced many of the famous can-vases to simple pen sketches in which he emphasizes the factors that contribute to the compositional schemes.

pression of the present." In an industrial age such as the present, where more and more the elements of motion are entering into the everyday minutize of existence, it seems highly reasonable to expect that present-day art shall echo something of the mighty forces sweeping through this century. Much of the constructionism so far worked out seems more or less a throw-back from the ubiquitous machinery that surrounds us today, but with these Russian artists working in their curious shell-like sections of celluloid there appears to be a sound and constructive approach to a new and highly provocative phase of art.

Art Schools

Now is the season of the art year when the various schools are winding up their programs with appropriate corresponds and artistication. The suther in the many little schools.

The suther in the compositional schemes.

One begins to appreciate how certain fundamental facts of geometry establish for the artist a substantial pattern on which he may proceed to weave his fancies. We are not always conscious of the need of mechanical balances, of comfortable distribution of weights and masses, but we demand such arrangement from a natural preference and inclination for order. Disorder makes us uncomfortable. Unbalance disturbs us. None of these negative feelings will help in the enjoyment of an object of art. There must be "repose" and "movement," order and rhythm. The construction of the object of art must have the same qualities of comfort and happiness that are sought by the human being in his style of living.

skeiches from masterpieces has fa-cilitated the approach for the lay-man to difficult compositional schemes by reducing them convincingly to arrangements, symmetrical, pyramidal, diagonal, circular, con-verging, etc. From these schemes as a starting point, one discovers how artists have wandered into all sorts of original arrangements in the sub-sequent development of their pic-tures. The book is readable and will be of help to one who does not want to be burdened with too elaborate

Subscribers to the picture buying fund of the Montclair (N. J.) Art Museum have purchased "Jimmy O'Day," a painting by Robert Henri for presentation to the museum's permanent collections. Another accession is "Scarlet and Blue," a painting by Hilda Belcher, pre sented anonymously.

## The Photoplay Makers

HOLLYWOOD, May 22 (Special Lewis, Junior Coghlan, Sally Rank Correspondence)—Harold Lloyd is and Frank Lackteen.

about to start a new comedy for Paramount. It is to be directed by Lewis.

Amount of the common start in the directed by Lewis. TLTRA-MODERN tendencies in art are well illustrated in the work of two Russians, Gabo and Pevsner, now represented at the and Pevsner, now represented at the Residual Residua and Pevsner, now represented at the Little Review Gallery, recently opened on lower Fifth Avenue. They belong to the group of continental artists generally known as Constructionists, and they have arrived at some interesting conclusions in their three dimensional experiments. They have elected to use a thickish sort of celluloid from which to fashion their models, and by combining variously tinted sheets with motels and wood they acknowled the solution of Donald Crisp. Bessie Hunter, the latter with a set of six thunter, the latter with a set of six thunter, the latter with a set of six to be the leading lady. Lloyd's acknowledge of Old South Street, New Thomas Meighan, and Jobyna Ralston is to be the leading lady. Lloyd's acknowledge of the summer group show to make its appearance in those galleries that on the avenue, is an exhibition of the new film the committee has been augmented by a number of real cludes Dolores Costello, Sam De Grasse, Holmes Herbert, Warner Gland, Marcelle Corday, Charles Clary, Templar Saxe, Eugene Besser, Rose Dione, Bertram Grassby, Their work does not end there: they remain throughout the making of the film and as new comedy ideas come to them they write them into the plot, thus often changing the entire ous Wreck," is being made into a trend of the original story. A mountain town has been built on a ranch just outside Hollywood as a back-ground for the new story and many

of the other exteriors will be made in Feather River Canyon in northern "The Great Train Robbery" picture, one of the first melodramas ever Fox is to make a modern version of made on film. Tom Mix is to be starred in it. The story, it may be recalled, was written by Paul Leicester Ford, auther of "Janice Meredith," and the film was crude as no one knew much about motion pictures at the time. The new version will be elaborate. Most of the scenes will be made in the Cascades of Utah and Colorado, and the equipment of the Denver & Rio Grande Railroad will

e used. Lew Seiler will direct. Production has started on Courtney Riley Cooper's story of the pioneer West, "The Last Frontier," which Metropolitan Pictures is filming at the Gap Trading Post on the Navajo Indian Reservation in Arizona, under the direction of George B. Seitz. In the cast are William Boyd, Marguerite De La Motte, Jack Hoxie who is playing Buffalo Bill, J. Farrell Mac-Donald, Gladys Brockwell, Mitchell

## Upon a Certain Impatience in Writers

formed. If they were all vocal and than to have arrived." It seemed to could make their literary wants known directly in clear speech, the great majority of them, it appears, would say not "Give us amusement," and not even "Give us wisdom," but "Give us facts." Such seems to be the belief, at any rate, of the publishers and editors whose business it discover and to supply the public demand for literary wares, and it seems unlikely that in a decision so ental they should all have

While making an extended survey, recently, of the magazine literature of America, I found innumerable "articles" upon innumerable topics, but in a whole year's journalistic output for the entire country there was only a handful of true essays. These "articles" were for the most part well written, according to the rather simple and superficial standards of their kind of composition. That is to say, they set forth in clear elementary words the leading "facts" of the subjects under discussion. indeed was there anything in them that could properly be called thought about those facts. The as-sumption seemed to be that facts are satisfying in themselves, and that if we can only get enough of them together in one place the whole pile will somehow be equiv-alent to knowledge. It seemed to me, as I read on and on, that this belief is no less naif than that of a millionaire who might suppose that a sufficiently large pile of dollars would somehow be the equivalent of

These innumerable "articles" were well written, I say, according to the rather low standards of their type, but when I tried to measure them by literary standards I saw at once that they were flat, styleless, and mechan-ical. They were always clear in neaning; now and then I found one but higher than this they very seldom aimed and never reached. Now I literature or even good reading. The ation table is clear, and also it is full of facts, wedged together as tight as they will stand, but it is not

By the time I had read some five hundred of these brisk, brittle papers I thought that I might venture a few tentative conclusions about those who wrote them, and even about hose for whom they were written. Writers and readers alike, I said to myself, seemed to be in a great hurry to arrive somewhere, no matter where, and to get something for themselves that they were not quite sure about. They seemed to have little leisure, and if that was true I knew that they could have little chance to make literature or to enjoy it. I thought that they were too impatient to reach their indefinite goals to find much happiness upon

CHRISTIAN SCIENCE PUBLISHING SOCIETY

MERICAN readers of nonfic-|their journeys, and I remembered tional prose no longer wish to that for the purposes of art it is albe entertained but to be in- most always better "to have traveled me that the writers were for the most part business people of pen and typewriter-which would not have to their discredit, of course, if they had been something more in addition -and that the readers who supported

them were business people too in de-manding the highest possible interest in the way of hard fact for their in-But I have thought since that I was too hasty in these conclusions. Writers can supply their public with only such wares as editors think the public will like, and readers, for the time being, must take what is provided. As I consider some of the thoughtful, wise, delicately wrought books that are winning favor just now with hosts of readers, I am in-

clined to think that our magazine editors are underestimating their audiences, providing too much journalistic comment upon current events, too many dull extracts from the encyclopædia, and too little literature / Most readers do want facts, I still believe, rather than art -if there must be a distinction-but there is a larger public for refined and highly civilized writing, I also believe, than my survey of current

magazines led me to think.

Perhaps I can best sum up the imression left upon me by those weeks of reading in the periodicals by saying that the familiar essay seems for the present to have disappeared. The place of this most highly civilized of "article," the business of which is to inform or to argue. Twenty years America in which one could expect to has a facility of transport and sculp-find true essays, urbane, well-man-ture that even running water can nered, charming in style, wise and genial in subject matter. Writing of this kind is still to be found in the that was also cogent and persuasive; and semi-literary nonsense are still but higher than this they very seldom prepared by professional press-feedaimed and never reached. Now I ers, but this work lacks the wisdom know, of course, that clarity is itself and the ripeness that we look for in a literary virtue, often very difficult of attainment, and I have toiled with stubborn words too long to cry it down, but I should hardly say that clearness alone will suffice to make literary virtue, of every difficult of attainment, and I have toiled with stubborn words too long to cry it down, but I should hardly say that clearness alone will suffice to make literary virtue, of every good reading. The latter that the ripeness that we look for in shapes to the work of ice; and in much of northern Europe and North America the lowlands received their smoothly swelling or hilly forms from the shaping of the rocky surmerely by his ability to whip words from the metaphor from piano playing, the materials by ice. light touch must include the legato, The thousands the staccato, the singing, and the pearly qualities; glissando alone will not suffice. Now it happens that the continents. most of our literary entertainers The engine of ice, though usually seem to be content, just at present, moving only a few inches or a few

> hasten thereby, though ever so little, back all the masses quarried from its, inevitable return. (For it will the cliffs by frost and rolled down ome back into favor again because it answers to a perennial literary need, and it will come soon, I think, in response to a public demand.) The slowly, and for hundreds of feet from the glasses of the glasses. familiar essay is unlike the "article" its edge the glacier may be buried under the débris heaped upon it.
>
> —written, that is, for and about the And yet the whole vast mass of passing day—but timeless. Although it may amuse us by toying with current fads and folbles, it is actually concerned all the time with the more than the constant show motion, is constantly changing its formula to the constant show motion, is constantly changing its formula to the constant show motion, is constantly changing its formula to the constant show motion, is constantly changing its formula to the constant show motion, is constantly changing its formula to the constant show motion and the constant show motion is constantly changing its formula to the constant show motion and the constant show motion is constantly changing its formula to the constant show motion is constantly changing its formula to the constant show motion is constant show motion. concerned all the time with the un, changing elements of human nature. It is different also in being more serious than it seems, whereas the is usually less so. The good essayist is likely to be a man well in-formed and well-read; he may even be learned; but he carries his learn-ing so lightly with so constant a ing so lightly, with so constant a sense of its secondary importance that he always seems to know just enough for his immediate purpose, no more and no less. The essavist may teach, he may even argue, but he never allows his reader to suspect that he is doing either of these things. He never preaches and he never scolds. Exhortation is not in his line. He prefers to influence per ple by the example of his own kindliness and urbanity, smiling away what he does not approve. He gives more light than heat. He makes his writing not out of almanacs and encyclopædias and card catalogues but out of himself. This means that he must be, as we say, "somebody to begin with. A good teacher will cheerfully undertake to teach any

adult who can spell and punctuate to write salable "articles" in ten lessons. To make a good essayist requires something more like ten gen-The chief mark of the essay is its amenity. Written by and for people who are not in haste to grow learned and who realize that literature is an experience rather than a school, an art and not a business, the essay at its best has the qualities of cultivated conversation. A true essavist knows conveyed by indirection, and he knows also that good manners forbid a heavily didactic, not to say a dogmatic tone. He allows for and delights in the endless variety of human nature: he collects and treasures the ddities of character and of conduct that the daily scene presents; he glories in the prismatic colors struck out in his fellows by the events of a changeful world. More than most men he has the wisdom and the charity to postpone judgment until the tree, rich in English lore, he has learned to understand. Yes, spreads farther than the shade I think it is his main business and leaves him little time and little taste for final judgments. Unlike the makers and the readers of "articles," he is not impatient for quick re-turns. He takes "all the time there is." Although he may work at letters votion that makes any kind of righteous activity into art. He has a deep respect for the tacis, out chiefly because he sees how they may be transformed into something better The truth about anything is never to

him a matter to be come at by drastic and violent acceptances and rejec-

tions but only by slow approaches; and he suspects that it is found only

m black or white but a thing of quiet shadings and nuances. In this rough characterization are the marks of the highly civilized man, whose guidance, enlightenment, and friendship we shall always need. Let us hope that he will soon return to us.

O. S.

#### Hepaticas

Written for The Christian Science Monitor They are like shy children Drawing their pink and purple frocks Closely about them, Refusing to lift their lovely heads Even to meet the sunshine, But smilling down On the cool, moist earth

With wistful joy. "Let the winds blow," they whisper "Our soft furry coats Will keep us snug and warm, When the sun Flushes our hillside We will unbend our slender stems And stand straight and tall Like school children Ready for their drill. But do not ask us To look up at the sun: We are children of the shade. Dream-children, perhaps, Loving the moist fragrance of the If we look closely at the earth

We will see tiny green things-Our friends and neighbors— Push bravely up To greet the sun And our slender, furry stems Will quiver with joy At this miracle of spring!"

Eleanor G. R. Young.

#### Ice Work

At first sight the tongue of fce descending from a snowfield into a valley seems a clumsy tool to do geological work. It is a mass of solid and brittle material that apliterary forms has been taken by the pears devoid of all flexibility and even of the power of movement; and ago there were several magazines in yet this seemingly immovable solid most unique and striking set of forms magazines of England, but in Amer- upon any region it has occupied. Our ica it is to seek. Reams of persifiage most splendid mountain ranges, with their sharp peaks, their deeply hollowed U-shaped valleys and their shaping of the rocky into a verbal froth. To adopt a faces and the spreading of the loose

But let us recall the grace and gularly well equipped for its work. beauty of the literary form we have For the supporting of heavy weights temporarily lost in order that we may it is a solid and can carry on its

> neath, and is always advancing in answer to the pull of gravity. The center of the icy stream moves faster than the edges, as in a river of water. The motion is more rapid on the outer side of a curve in its brittle solid its mode of adjustment to these changes and to the varying grades of its valley is, of course, en tirely different from that of a liquid

The actual mechanism by which it. moves is not entirely certain. Glaciers are made up of "grains" of ice, each an imperfect crystal, which themselves. Pressure lowers the the motion of the mass, one grain little liquid water is formed which slips always to a place of less pressure and instantly becomes This property of "regelation no doubt aids in the slow movements of the glacier, but the process goes on so inconspicuously as not to be are large scale adjustments of the ice, forming "crevasses" and even "seracs," which are among the most striking and important of their features.-From Introduction to "Ice Ages Recent and Ancient," by A. P. Coleman.

#### The Hawthorn Tree

The legend of the tree in the front yard for centuries promises enchantment, though the little cottage is shedding its color and becoming gray, while the tree that casts its fraternal shade upon the windowpanes and across the arching doorway is brilliantly pink with its hard pressed blossoms. Everyone who passes along the

street of a Sunday on the way to the park remarks the glory of the cast under the beams of the setting Friendly to all, the tree wears its pink blossoms with grace and dig-nity. It is a definite part of May-time, indicating the full tide and color of a May that is fast yielding her rosy scepter to June, as she is wooed away by the south wind. The plnk petals make of the narrow street a poem, with rhythms which

## Sturdy English Painters

Before a group of gifted French with sharp church spires standing painters, gathered at the Forest of Fontainebleau, had revolutionized the Like Constable, he is fond of dark art of landscape painting, some Eng-skies and storms; lightning-rent cialist would have the same spirit lish artists, less familiar now and less popular, had been making a less popular, had been making a faithful study of English landscapes, with a kind of lurid gleam. He is an art, and pass from the ranks of arti-

Of these, Constable is no doubt the light effects, prismatic colors. But onthe the most familiar—familiar, that is, as a strangely enough here, too, is the name, for this father of landscape same sable, subdued color. The title is but another way of saying that this luggage, no doubt, which first catches at the imagination. Someone it will lose its influence in the world, catches at the imagination. ioned and obsolete. Yet as we look sharp clearness of outline; but again at his pictures, what a vivid sense of we are confronted with dull tones, strong, vigorous personality do we dark trees, a pale sky. And the Camreceive. There is a massiveness—al-most a solidity—about his achieve-Ruskin's almost dazzling description ment. Compare those trees with their of it, these dark cliffs and the everdense and heavy foliage, a dark-brownish green, with the delicate mistiness of the trees of Corot or the shimmering radiance of the sunlit works of Monet! Compare, too, those heavy white substantial clouds, with heavy white substantial clouds, with the clouds of almost any more recent his first acquaintance came through

Here is Hampstead Heath; in this picture the mood is tense, dramatic. We are oppressed by the blue-green, ominous sky, the sense of impending storm. But there are the same brownish hills and somber trees that we have learned to associate with his work. In the foreground is a heavy wagon, with laborers—sturdy, too, as the trees and the clouds. All in all a the trees, and the clouds. All in all, a picture somber and gloomy. Is it the spot itself, we wonder, or the mood of the artist? And then, just by accident, we come upon some lines entitled "Hampstead Heath," by W. hawthorn, for the enchantment of Gibson, and our question is answered. For the poet has chosen the place in the spring, a blaze of color, a fit background for youth and ecstasy.

> Against the green flame of the haw thorn tree, His scarlet tunic burns; And livelier than the green sap's mantling glee

Here, indeed, is a new Hampstead Heath, far from the impressive gloom, which is the mood of Constable the wind supplies. In coloring and grace the tree is like a colonial not always this omnous note. Often it is a mood of calm fruition, a kind of passivity, placid, serene, with heavy white clouds amassed overselved to find unassociated facts piled high as the roofs of libraries. . . It were more humanity to relieve them of of passivity, placid, serene, with heavy white clouds amassed over mere humanity to relieve them of Keen voyagers, while still the im

derer to the region of Puget Sound, a beautiful image that has drifted on a pink ocean down the centuries, retaining part of the roseate foam among its colorful leaves.

There can rest no doubt of the shade of its branches, the pans of the kitchen become a silver service, and the tiny cottage becomes to the cheerful housewife a palace on a greensward that stretches onward in happiness.

The result of the roseate foam among its colorful leaves.

Crome gives us similar landscapes. His brown, however, is more of a golden-bronze. Here is one where a polden-bronze windmill—all of golding of the kitchen become a silver service, and the tiny cottage becomes to the cheerful housewife a palace on a greensward that stretches onward in happiness.

The result of the roseate foam among its colorful leaves.

#### Glimpses

There is much to be said for a glimpse. It would seem that it is often far more enjoyable than a pro-It does not begin with a prelude glimpse at the far-off end that began full of promise and then lose itself it all! in mere commonplaces. It gives one a good send-off and vanishes, leaving the field to the imagination.

There is an entire novel to be made, for instance, out of the fleeting glance into one of the hundreds of taxicabs that pass through the narrow exits from Charing Cross Station into the Strand. As a general rule these taxis have to be patient the age in which they happened. and await their opportunity before Thus, perhaps thus only, will the taking their place in the medley of spirit and the practice of synthesis passing vehicles, and it is then, if you chance to be held up, too, that you get a glimpse of the new arrival

> Usually there is luggage heaped up heavy pieces of goods that have colarrived; and there, within, is the Someone sure enough, looking out eagerly at the new world of activity so welcome after the train, and the boat, and other countries perhaps a

great way off.
You look around to see what the Someone is seeing, but that is impossible. Your eyes only behold the things you know by heart: the woman in the black-feathered hat who stands under the archway and sells violets; the old Golden Cross Hotel over the way; the man in the red coat who kneels on a little piece of carpet and polishes other people's boots. These things are part of your existence and are seen as such; they newness that surrounds them in the eyes of the arrival.

And then, if you have the time to spare, you begin a story all for yourself, with the Someone as the central figure. It will, in all probability, be only a short story, for the world is crowding about and pushing up as ainst you and your thoughts, and then, across Trafalgar Square and round the corner into the Haymarket and the whole thing is instantly forgotten in a far more thrilling

Here, drawn up against the curb, is a big, black car; a most businesslike, and almost terrifying-looking piece of machinery, with energetic doing energetic things with more luggage. From the movements of all concerned it would seem that some thing big is afoot, and that there is not much time to spare. The curtain has risen on a scene full of possibilities. A grim determination pervader ing play. On the side of the black car, in white letters, is written "Aerial Transport."

There are no passengers, so far as you can see, but their absence only adds to the thrill of the thing. Somewhere, getting ready, just about to start, the owners of that luggage are contemplating their flight through the skies. You look up. Blue, and silver clouds, and blue again—a

great, great distance.

Just glimpses. But sometimes one remains. It is a seed lodging in a place where it can grow. And then, one day, a big thing comes to light

Would it were possible to unwind beginnings, just to discover the

## The Skipper of the Floating House

By MABEL S. MERRILL

Part II. TANTON was on his feet and very wide awake as Neal's last big push sent the floating house out into the river beyond the reach of the falling firebrands. After that push the water was so deep that the pole would not touch bottom, and the boys could only stand idle at the wide doorway. The heavy little building was turning and swinging in the current which was steadily carrying it farther and farther from the east bank. Small animals driven by the fire from the mountain side were swimming past them, and ence the red glare from the shore showed the head and shoulders of a big moose stolidly making his way through the

deep water.
"The old fellow is heading downstream," commented Tracy. "Wonder why he doesn't go straight across to the west bank. The river is pretty wide here, but that wouldn't be too ton, who was the only other boy long a swim for a powerful chap like taken Otis for a walk around the island shore in the hope of seeing

"What I'm wondering about is there we're going to hit land our-

"Well, we're out of that blaze any way," returned Tracy shortly. "With the fire burning all down the shore as far as you can see we're lively and if you woodshed all the woodsh your woodshed all the way back against the current." as far as you can see, we're lucky to be on board this boathouse instead of swimming round and round like word, and Stan, feeling rather ashamed of himself, stood on the store to watch. Hadn't it been pretty

#### An Island Refuge

They found out after a while why the big moose had headed downstream. Before them loomed a small chase? There was an extra pair of bushy island with one or two tall oars in the boat; he could have retrees in the middle, and the swimming animals were taking refuge up river. Even now the rower was there. The moose had already clambered out and disappeared in the from being swept downstream by thickets. As they neared the island the swift current that eddied around the water was shallow enough for a sunken rock the top of which came Neal to use his pole again. They just above the surface. He would swung the boathouse as far inshore have to get out of that eddy before as they could and moored it by the he hit the rock and he was obliged chain to an overhanging willow. to work with all his might in order Then, with a last glance at the burn- to do it. Stan felt guilty as he ing shore they had left, they lay looked. down to wait for daylight.

With the first glimmer of dawn they were astir, so eager to explore the small island that no one grumbecause Neal limited their which had appeared in the water breakfast to one slice of bacon for right below Neal in his boat. It was each.

"I want all the rest of it to flavor the beans," explained Neal. "I'm going to make a bean hole right here on the shore and put in two or three on the shore and put in two or three aside for. Or perhaps the animal quarts of beans out of that bag you struggling with the swift current had made fun of me for bringing. They're not seen the human intruder till it a trifle too dry, but if I boil them a was too late to change his course, little and bake them for a good deal, At any rate, the boat, carried rapidly as our old camp cook used to say, downstream, came so near a collithey'll be pretty fair eating. Lots sion with the big creature that an petter than nothing, anyhow." tter than nothing, anyhow." oar was knocked from Neal's hand.
"How long have we got to stay In the effort to recover it the boy

here?" asked Stan Discussing Plans

"Till we can think of some way to go on. We're about the middle of this moose had got out of the eddy and big river and we can't do much toward steering the floating house while the boat, tilted up on its side, with nothing better than a pole. had been swept down against the Down river there are rocks and sand- rock. bars where we might get in a scrape if we couldn't pick out our course."

Stan was an excellent swimmer and he had no fear for himself as he

Stan was an excellent swimmer and he had no fear for himself as he hattled his way to the rescue. But his mind was full of pictures of Neal as he had been all this trip; patient, hard-working, good-natured, and isn't any fire."

"The kid couldn't do it if we had been all through so far, "The kid couldn't do it if we had been all through so far, had pulled them all through so far, had been all through so far, had pulled them all through so far, had been all through so far, had pulled them all through so far, had been all through so far, had been all through so far, had pulled them all through so far, had been all throu

ing to eat on a 10-day tramp. It would take us nearly that long with to give up.

The swimmer's heart gave a great all the setbacks we'd have."

"Well, we're all right for the resent," pronounced Tracy. "Supsee you knew this island was here,

"Well, we're all right for the leap of thankfulness as he saw his column sticking fast to the rock on the other side of the boat. Neal was leave the rock on the other side of the boat. Neal was trying to keep his more than the leap of thankfulness as he saw his collie which he considered to be the other side of the boat. Neal was trying to keep his precious craft from being swept away by the swift water.

The two boys succeeded in righting tempers, but bad temper is not treachery.

When choosing a collie, my friend Wonder what else you know. You look to me as if you still had The two boys succeeded in righting the boat and bailing out the water. Then Stan picked up the extra oars and disposition, never for mere show stan picked up the extra oars. something up your sleeve.

Neal chose to answer only the first part of this remark. "Yes, of course part of this remark. "Yes, of course I knew the island was here. But I wasn't at all sure we could get to it with our floating house. My idea "Sit still and get your breath, old collie is your chum for 365 days of it with our floating house. My idea was to push out far enough from the shore to be safe and then push back again when the fire had gone by. Those firebrands falling all around us soon convinced me I'd have to get out into the current whether I could get back or not."

Camp Cooking

Neal fixed his bean hole and presently had a big pailful baking in a spot of ground heated by a roaring fire. Then he slipped away for a walk around the island shore. They did not notice his going, for Otis was shouting joyfully over a white perch he had caught out of the or of the boathouse and the other two boys were eagerly hunting for their own fishhooks. They had an ample dinner of perch toasting on the coals when Neal came back. But they suspended cooking opera

tions to stare open-mouthed at their leader, who had not returned on foot but in a stout little boat which he was calmly rowing around the shore. Found it just where I left it one day last summer when I had to take another fellow's motorboat ashore for him," explained Neal. "It

was hauled up snuggly in the bushes, oars and all. Looks weatherbeaten but it's all right and won't leak when the seams have had time to swell. Otts with his fish on a pointed stick, eyed the boat soberly. You won't start off down river be

fore the beans are done tomorrow," he urged as they began eating.
"No we shall stay long enough to eat the beans and all the fish you the words reading from left to right, also read the same downward.

catch if they're as good as these,"
Neal assured him.

They felt much more cheerful
after that hearty meal but Stanton
los: his patience again when, later
in the day, he found Neal busily installing in the boat that engine he
had insisted on bringing from the

camp cellar.
"You'll make the thing so heavy It will be like rowing a woodshed. And what's the sense of installing an engine when we haven't a drop

f gasoline?"
"I'm hoping to be able to get some s soon as we reach the first camp r farmhouse," explained Neal good-aturedly. "You see, Stan, rowing s slow work and we're still 'way p in the wilderness with no supplies. It'r a good stretch yet down o any place where we can buy food. 1. A consonant.

Were builded with his own into the walls
As offerings to God.

There is scarcely a large city in

the United States that has not at least one Gothic church. Because of

their pointed arches, you will dis-

tinguish them easily. The pointed arch is much more adaptable than

of two feet, how high must a rounded

It could not be more or less, for it

ed arch solved many problems for the builders of the Gothic style.

Another problem was how to do away with the thick walls of the Ro-

manesque style. You will recall that

in this style it was necessary to use

the smallest windows possible in order not to weaken the walls, which

had to bear the weight of the heavy vaulted stone roofs. Now in the

northern countries more light was needed than in sunny Italy where the

early Christian styles originated. So something had to be done about it.

Buttresses and flying buttresses were

In the Romanesque style we found

that the weight of the roof, resting on the walls, caused an outward

thrust or pressure. In the Gothic

style this pressure was neutralized

by counter pressure, so that the building rested in a framework of

buttresses, flying buttresses, arches, and piers. As the walls no longer

required such great strength, large windows were inserted, adding much

beauty to the buildings.

The buttresses were built outside the building and joined to it by fly-

ing or arched buttresses. You can

see at once how different these Gothic

churches are from an Egyptian or Greek temple, with their lintel and

pillar construction. Also, you would never confuse them with the build-

ings of the Roman style with their

The windows of this style had carved stone frames, or tracery. Some

of the tracery was very elaborate, al-

filled with pieces of bright-colored glass joined together by lead or iron.

You can imagine how beautiful these

the light streaming through them.

Another important Gothic feature

was the network of ribs or moldings

that covered the vaulted roof, giving

it greater strength.
So, you see, the various features of

the Gothic architecture were worked out intelligently to meet special

needs. For this reason, this is some-times called the most intellectual

style, just as the Parthenon in an-

cient Athens was called the most in-

tellectual building. You can under

that each is securely fastened to its owner in some way so that it cannot make trouble by getting loose and running off.

# 'The child who reads is the child who leads'

## A Right Beginning

The child today has stories read to him long before he is able to read himself—as soon as he is old enough to understand words. Even before he is conscious of the environment outside the home he is under the influence of that which he hears, especially that which is read for his entertainment.

## **My BOOKHOUSE**

is a mother's selection of stories for her own child—a selection from the classics of childhood, but each one chosen because it interests the child, instructs, and presents sound standards of conduct.

child, instructs, and presents some standards of conduct.

Every one helps the child in seeing clearly the distinction between right and wrong, and solicits his admiration for these qualities which are truly fine. My BOOK-HOUSE is as remarkable for what it omits as for what it contains. Six volumes, 2560 pages, 537 titles by 197 authors, profusely litustrated in black and color.

FREE! "Right Reading for Children," a helpful booklet for every parent, containing practical information on character development. Also "Appreciations," an interesting compilation of unsolicitid letters. Both booklets sent immediately upon request.

## Citizens of the World

My BOOKHOUSE contains the foundational literature for children. But the child needs additional sources equally as sound in appeal and influence. To meet this need My TRAVELSHIP is published.

Its plan and purpose is to acquaint the children with the customs, literature and art of other lands, and influence, early in life, an appreciation of the essential unity of mankind.

## My TRAVELSHIP

consists of three volumes, with nearly every page illustrated in four colors. Nursery Friends from France is made up solely of rhymes. It in-troduces to children the grent gal-lery of French nursery characters. Little Pictures of Japan is a selection of Japanese hokkus and legends representing the best folk literature from the land of birds and flowers.

Tales Told in Holland is a volume of longer stories, replete with old world interest and charm.

Truly new and different travel books, revealing the countries through the eyes of their people. Write for descriptive literature.

## Ten Thousand Feet Above Loop Level

Henry Justin Smith, managing editor of the Chicago Daily News, leaves his office, leaves the Loop, the turbulent district at the focal point of a big city, where all the ordinary affairs of humanity are congested, and for 18 months is assistant to the president of the University of Chicago, as head of the Public Relations Office. The following series of four articles is upon certain outstanding brought back by Mr. Smith from this college atmosphere. Returned to his position on the News, he relates, in interesting style, his surprise in having found none of the caricatured types among the professors.

By HENRY JUSTIN SMITH IV

THERE is no special sequence in of special shots and cut-outs just as the memory itself is. Nor can one express so briefly the odd mixture of the quaint and the significant, the ludicrous and the sublime. Let us just for a moment poise ourselves on the very heights, which a moment ago we approached in considering "the perfect gentleman." And let us recall the most heartbreaking days in our whole experience; almost too terrible they, alnost too sacred, to be described at

Indeed, one sets down the title of stand him. incongruity with what has gone be-fore; with a feeling that the word may be too strong for some tastes. Yet, let us try it. The title, then,

term. He would have smiled his quick, fleeting, but winning smile and said, "Oh, that won't do."

How firm, how blunt he could be! How he could set his jaw; how compactly his body and mind would coordinate, while perhaps he walked up and down his study! How grimly he set himself to comprehend and to galvanize with energy such worldly things as blue-prints for buildings, idget figures, publicity plans, and rearrangements. He was estined to control conferences which dealt with matters so mundane as millions of money; to compete with Inancial and statistical experts, both great age, alas! forbids him now to emerged, even in moments when his secret self seemed lost, he disclosed ocean liners, and who thus, we rethe attitude of one so pure in motive, gret, deprives us of his companionloting, that even the most arrogant, parboiled and overfed person whom he approached must have parted from him with a sense of the strange spot, and for whom a special affection.

Hated Falsity

He hated falsity and foulness as a saint does. He forgave the criminals, but loathed the crimes. He, rfect gentleman with the added lity of angel, admitted to his office people who made confessions of ignorance or who unwittingly revealed selfishness and subtleties. He did not scorn these people. He pitied them. Sometimes he would be misrepresented by some one, say newspaper headline writer; and would seem to ponder for an instant whether the slight could be intentional; but, quickly deciding it was not, he would say, "I suppose the fellow did the best he could." Thousands of proposals, mostly lacking sense, were made to him, among them. How often have they cheerfully discussed with such a documents were laid before his stranger, may told him in one-syl-

vas not good.

He planned mightily, and mightily ringly did he toil to complete. Then at their height a voice them. Then at their height a voice seemed to say! "You shall leave all this unfinished; you shall never see standing, in triumphant completeness, the walls of a single building you began; you are done."

Like many a real man, he fought the voice. His faith made him resist it as long as he could. But just then nearly everybody thought that was about to pass on he was still aking beginnings. In a bedroom, ting at a little table, he wrote

descend.

The preparatory committee of the World Economic Conference in 1927 announces that complexity of doing business in Europe is a standing war menace. Do you think that agreement by European nations on a uniform and permanent tariff would remove economic friction?

If an international agreement could be made by nations to manufacture only such goods as they had raw materials close at hand for, would it make for peace and prosperity?

Or, in your opinion, would this interfere too radically with private business and the law of supply and demand?

Would such a readjustment lead to general dissatisfaction? Do you think that injection of too much advice on the part of an international commission would verge too closely on a Socialistic state and smack of paternalism to a dangerous point

Has the strike ceased to be an effective means of advancing the interests of Labor, as indicated by events of recent weeks in England and recent months in America? How much is due to misdirected leadership or to weight of public opinion?

Does it necessarily indicate that the status of labor has been lowered or weakened, or does William Green's idea of gathering around the conference table show increasing intelligence and understanding of mutual social dependence?

What bearing on the interests of the consuming public has the present trend of relations between Capital and Labor? itor of May 1 to 12, inclusive; also Feb. 10-12.)

Two questions, based on matters of public interest recently printed in The Christian Science Monitor, are put regularly in the above form on the Thursday Educational Page. The purpose of these questions is: To assist in a more thoughtful reading of the Monitor—on the part of all its readers. To present questions adapted to use as the basis of discussion or debate in secondary schools and colleges; frequently one for the upper elementary schools.

THE south country is less industrial than the north, but such industries as do arise have been at his lectures, and, as he answered carefully fostered by educational inany questions that were submitted, he gave free play to his delightfully ampton, is fortunately situated in a dry humor. He did not tell the stu- rising port which is winning for dents how to produce first-class itself an increasing interest in the

> The authorities have seen that, in regular university courses, some arrangements must be made to increase the technical and mental efficiency of boys who have entered industrial works straight from school at the age of, say, 14. A scheme has been drawn up with three of the largest industrial employers in the city—Thorneycrofts, the Supreme Aviation Company, and Messrs. A. V. Roe-by which such boys can obtain technical and general education at the University College without any loss of employment. The firms assist by arranging convenient hours for the boys, and also by supplying scholarships which cover the tuition fees to all who do tolerably well. The scheme has worked satisfactorily, and the employers have consistently increased their payments to boys who have done well in these courses. The schedule of work is a wide one, and includes practical mathematics, mechanics, engineering drawing. Schemes with other employers have been entered into on a similar basis.

The cultural interests of men employed in industry in the south are catered for largely by their own activities. The Workers' Educational Association, a co-operative educa-tional movement between the industrial classes and the universities, is the main source of non-vocational adult education. Men and employed in commerce and industry gather for courses of 24 lectures throughout the winter. The schedule of lectures includes economics, in-dustrial history, music and literature.

The recent educational develop-ment which is possibly most typical of the south of England is the Post-War Brotherhood Federation. This movement arose among industrial workers in Hampshire after the war, and is fundamentally a peace movement. It emphasizes the possibility of co-operation between individuals between classes in the state, and between nations.

## STOCK MARKET PRICES AGAIN MOVE FORWARD

Buying Orders Distributed Over a Wide List of Securities

By the Associated Press

Sales

| Solidar | Solidar

NEW YORK, May 27—The main price movement continued upward in today's stock market despite rather heavy pre-holiday profit-taking in some sections of the list.

The stiffening of steel prices, recordbreaking car loadings for this season of the year, unusually favorable railroad earnings statements, and favorable trade reports continued to provide the basis for the buying movement.

Professionals continued to dominate trading, but increasing public interest was reported, particularly in the oil and railroad shares.

Revival of speculative interest in the motor shares, based on predictions of record-breaking second quarter earnings by several companies, was one of the features of the session.

A rather thin market also was apparent for some of the high priced industrial specialties, General Electric soaring nearly 5 points. American Ice, Worthington Pump, and Several others climbed 3 points or more.

Local tractions continued their advance, and were followed into higher ground by local gas stocks. Several of the independent steels advanced a point or so on buying influenced by the belief that the recent advance in steel bars would stimulate forward buying orders for other products.

The higher renewal rate for call money was considered only temporary, being generally attributed to the usual heavy pre-holiday demand for currency. The credit situation is regarded bany bankers as relatively easy, with no prospect of a permanent stiffening of rates before the crop moving season.

Bonds in Demand

Bonds in Demand The improvement in financial and business sentiment which has followed the stiffening of staple commodity prices, gains in railroad earnings and trac, and reports of increased buying in several industries contributed to the steady forward movement of the bond market today.

Speculative operations again over-

bond market today.

Speculative operations again overshadowed the quiet flow of investment buying, finding the most satisfactory outlet in the traction and oil issues. Increased earnings and the recent freedom from political interference have been important factors in stimulating the demand for Interborough and B.M.T. issues while bus line proposals have been an added incentive to the accumulation of New York and Third Avenue railways liens. Most of these bonds held around their 1926 high levels today.

igh levels today.

In the railroad field second grade In the railroad field second grade issues again atracted the bulk of new buying orders. Obligations of the New Haven, Frisco, and other roads, which are more sensitive to improvement in carnings, were setting and bigher. are more sensitive to improvement in earnings, were active and higher.
Skelly Oil 6½s, ralying 1½ points to 141, led the advance in petroleum issues. Foreign and United States Government bonds were quiet and steady.
A good response was accorded to the day's new financing, which included \$25,000,000 province of Ontario notes and a variety of smaller issues.

#### NEED URGED OF NEW CAPITAL STRUCTURE FOR ST. PAUL ROAD

NEW YORK. May 27 (A)—Coverdale & Colpitts. engineers. In their report today to Kuhn. Loeb & Co., and the National City Company, reorganization managers for the St. Paul Railroad. show that the road failed to earn its interest charges last year by nearly \$4,000.000, proving, according to the bankers, that it was "hopelessly insolvent," and demonstrating the need of a new capital structure. The St. Paul went into receivership in 1425. The bankers made public a reorganization plan the same year and modified it on Nov. 19 to meet the objections of minority interests. The actual decree of foreclosure was signed on April 27, 1926.

## CUSTOMS RULINGS

NEW YORK, May 27 (Special)—In sustaining protests of the International Forwarding Company of Chicago, Koons, Wilson & Co., et al., of Philadelphia, the Board of United States General Appraisers finds that certain soccer shoes composed of stout, heavy leather, having six projecting leather cleats or calks on ethe underside of the soles, were improperly taxed with duty at 30 per cent ad valorem under paragraph 1402, tariff act of 1922, as "equipment such as is ordinarily used in conjunction with balls in exercise or play. The importers testified that these shoes are used in garden work with the calks taken off. Judge Sullivan therefore grants the claim for free entry under paragraph 1607 of the said act, as "boots and shoes made wholly or in chief value of leather."

Certain artificial whetstones of emery and argillaccous earth, imported by L. E. McCullough & Co., St. Louis, are held by the board to have been properly assessed by the collector at 20 per cent ad valorem under paragraph 1415, 1922 act, as sensed to the collector at 20 per cent ad valorem under paragraph 1415, 1922 act, as annufactures of emery. The importer's claim for free entry under paragraph 1590 and the similitude claim under paragraph 1590 and the similitude claim under paragraph 1590 and the similitude claim under paragraph 1460, 1922 law, is therefore overruled by Judge McClelland, who points out that the protestants had not succeeded in proving that the collector's assessment was erroneous, nor that their own claim was well founded. 200 Eile Battery 77

VACUUM CLEANER COMPANY
CLEVELAND, May 27—Electric Vacuum Cleaner Company, a subsidiary or
General Electric Company, declared an
extra dividend of 1 on the common and
the regular quarterly of 1 on the common and \$1.75 on the preferred, all payable July 1 to stock of record June 19.
Directors also voted to redeem 3500
shares of preferred stock on July 1 at
\$116 a share and accrued dividends.

SKODA WORKS PROFIT
LONDON, May 27-Net profit of the Skoda Works in 1925 totaled 35.500,000 forowns, compared with 32.194,000 in the units of 44 crowns each, compared with 40.

BOSTON STOCKS KANSAS CITY

ROAD'S GAINS April Gross for That Month a Record—May Earn \$8 Share on Common

Kansas City Southern Railway in April had the largest gross earnings for that month in its history, with the exception of April, 1921, which ex-ceeded last month's showing only slightly. slightly.

In fact ever since the first of this

In fact ever since the first of this year monthly earnings of this road have been showing marked gains in both gross and net over the corresponding months of 1925.

April gross of \$1,846,693 gained 12.4 per cent over April last year while net operating income of \$535,031 gained 55.5 per cent.

April gross of \$1,846,693 gained 12.4 per cent over April last year while net operating income of \$535,031 gained 55.5 per cent.

With April gross close to record volume for that month the ratio of operating expenses to gross was extraordinarily low, being only 64.27 per cent, compared with 72.20 per cent in April, 1925. Transportation expenses took 30.65 per cent of gross, compared with 33.32 per cent last year.

For the four month's period ended April 30 the showing is good, gross increasing \$521,702, or 7.9 per cent, and net operating income increasing \$515, 732, or 34.5 per cent.

The figures in all cases include the earnings of the Texarkana & Fort Smith, which operates the Texas mileage to comply with laws of that State but which is entirely owned by Kansas City Southern.

Interests close to the Kansas City Southern expect that the road will be able to maintain a relatively low operating ratio for the balance of the year. In other words the April result is not a mere flash in the pan.

Indications in the road's territory point to an excellent year's business in 1926, and the property has been placed in first-class condition to handle that business economically.

Those in position to know the business prospects and what the road can do in the way of operating costs believe that Kansas City Southern this year may be able to earn the equivalent of close to \$8 a share on the present \$29,959,900 common stock, which would make 1926 considerably the best year the road has thus far had.

The best year to date was 1923 when a balance after preferred dividends equal to \$6.45 a share on the common was reported. In 1924 and 1925 earnings were somewhat behind the 1923 level, the balance for the common was reported.

was reported. In 1924 and 1925 earnwas reported. In 1924 and 1925 earnings were somewhat behind the 1923 level, the balance for the common being respectively \$3.81 and \$4.25 a share. The road is now again coming ahead strongly.

ahead strongly.

The results for the year may be somewhat changed by the progress of unification of the Missouri-Kansas-Texas and the St. Louis Southwestern with the Kansas City Southern. Kansas City Southern now has a large stock interest in each of these roads, and plans for unification are making headway.

#### DIVIDENDS

St. Louis Southwestern declared the regular quarterly preferred dividend of \$1.25, payable June 30 to stock of record June 15.

LONDON STOCKS GENERALLY FIRM, BUT RUBBERS OFF

LONDON, May 27 (Special)—The stock market opened firm, despite the lack of confirmation of the overnight report that the deadlock in the coal dispute had been overcome.

Industrials were better. Oils were firm. Mines and home rails were well maintained.

Rio Tinto was strong on Paris buying. Rubber issues were easier on the increasing stocks of commodity here and the recent sharp drop in the staple.

Foreign rails were in demand, especially Canadian shares which were bought on reports of excellent crop prospects. Royal Dutch was 33 %. Rio Tinto 37% and Courtaulds 6 19-32.

The glit-edge division was firm. French and Spanish issues were helped by the surrender of the Moroccan Riffian chief. Turkish issues, however, were lower on the breakdown in the debt negotiations with this country.

CHESAPEAKE & OHIO BUYS WATERFRONT

RICHMOND, May 27-Chesapeake RICHMOND. May 2?—Chesapeake & Ohio has purchased approximately 70 acres of the Old Dominion Land Company waterfront adjoining its terminals at Newjort News. This announcement was made by Garrett B. Wall, vice-president of the Chesapeake & Ohio, who said that the property was acquired for the purpose of taking care of future improvements. "We have no definite plans at present." Mr. Wall said, "but we have used practically all the waterfront property we own in Newport News and are looking to future growth and expansion, to care for which the land involved in this purchase is necessary."

FAMOUS PLAYERS OFFERING

Approximately \$20,000,000 in new common stock of Famous Players-Lasky Corporation will be offered to share-holders, it is understood, to finance the acquisition of a controlling interest in Balaban & Katz of Chicago, operating a chain of theaters, and to complete contemplated expansion plans.

LACKAWANNA ROAD'S EARNINGS
Delaware, Lackawanna & Western improved its earnings in April, net operating income rising to \$1,726,572 from \$1,556,330 in April, 1925. Net for the four months this year, however, fell to \$4,051,957 from \$4,552,973 a year ago.

GREAT BRITAIN'S APRIL TRADE LONDON, May 27—Comparative shipping movements in Great Britain for April show foreign trade arrivals of 4,619,206 net tons and cleared of 5,224,020 net tons. Coasting trade arrived to-taled 1,703,585 net tons and shipped 1,742,207 net tons.

LONDON RUBBER STOCKS LONDON, May 27—Rubber producers carrying London stocks out of profit in the hope of stabilizing the price at 28. 6d. a pound are unlikely to modify their policy until stocks reach 35,000 to 40,000 tons.

April surplus of the St. Louis South-western amounted to only \$833, compared with \$34.875 in April, 1926. Surplus for the four months was \$451,395, compared with \$448,097 a year ago.

BARNSDALL CO.'S EARNINGS REPORT

TULSA, May 27—Barnsdall Corporation, including subsidiaries and Waite Phillips Co., for four months ended April 30, 1926, reports net income of \$1,862,530 after interest, federal taxes, depreciation and depletion, compared with \$736,304, exclusive of Waite Phillips Company earnings, in the corresponding period of 1925.

Consolidated income account for four months ended April 30, 1926, shows gross income, \$3,651,297; interest, federal taxes, depreciation and depletion, \$1,783,767; net income, \$1,862,530; dividends, \$568,780; surplus, \$1,293,750.

BETTER BUSINESS A FACT That the general business of the country is on the upgrade is reflected by the semi-annual statement of the Bank of Montreal. At the last annual meeting Sir Vincent Meredith, president, stated that there were then indications of better business conditions. This has proved to be the case, as shown by the report to April 30. This tendency is reflected in the substantial growth in current loans and in a rduction in holdings of investment securities.

NEW BEDFORD GAS FINANCING
The New Bedford Gas & Edison Light
Company, New Bedford, Mass., is inviting proposals up to noon, June 18, for
purchase of \$572,000 5 per cent first mortgage bonds due Jan. 1, 1938. At the
same time the company gives notice that
it has called for payment July 1, 1926,
at 105 all of series C of the company's
first mortgage 6½ per cent gold bonds
maturing Jan. 1, 1938. The amount called
is \$572,000.

MAHONING STEEL OPERATIONS MAHUNING STEEL OPERATIONS

Ch NEW YORK, May 27—Manufacturers of railroad equipment are enjoying highly satisfactory earnings despite the slackness in the demand for new cars and locomotives that has previaled since the first of the year. In fact most equipment companies are showing larger earnings than in 1925. Car and engine builders received more business in the first four months of 1925 than in the corresponding more business in the first four months of 1926 than in the corresponding period of 1925, although incoming orders were still subnormal. This, added to buying late last year, has enabled most of them to show a substantial balance for stock so far this year, and moderately satisfying results for the half-year to June 30 are practically assured.

assured.

Locomotive builders, while running at a comparatively low rate of capacity, probably 40 per cent on the average, are well in the black. American Locomotive in the first quarter earned its dividends on both classes of stock, and indications are that earnings for the first half-year, including earnings of Rallway Steel Spring, will fully cover dividends on the increased stock issued to take over the lastnamed concern. In 1925 American Locomotive showed a deficit before dividends of \$843,221.

Baldwin Locomotive is also under-

dividends of \$843,321.

Baldwin Locomotive is also understood to be showing a substantial balance for stock, though no definite estimate is possible at this time. Both concerns went into the second quarter with a satisfactory volume of unfilled orders. Baldwin last year had net profit of \$196,564 before dividends, but made no depreciation charge-off.

Locomotive orders for the first four months of 1926 were 706, com, ared with

months of 1926 were 706, compared with 572 to April 30, 1925. There was also a fair carry-over from the end of

How well the companies that do not How well the companies that do not rely on new car and engine orders are doing is indicated by the fact that earnings of American Brake Shoe & Foundry so far this year are about 10 per cent ahead of 1925, the previous record year; New York Air Brake's first quarter net is estimated at around \$2.50 a share on its common; General Railway Signal earned better than \$2.80 a share in the first quarter.

\$2.80 a share in the first quarter.
That Westinghouse Air Brake is sharing in the general prosperity of this branch of equipment trade is indicated by its extra dividend last quar-

#### THREE-DAY RECESS FOR STOCK MARKETS

NEW YORK, May 27 (A)—Members of the New York Stock Exchange voted to suspend business for the customary two-hour session next Saturday for a three-day recess over Memorial Day, resuming trading on Thesday. The New York Curb market, cofton exchange, sugar exchange and the rubber exchange also will be closed for the three-day period.

CHICAGO, May 27—The Chicago tock Exchange voted to close Satur-

The Boston Stock Excharge has oted to follow the New York Stock Exchange in omitting next Saturday's easion, thus giving its members a hree-day holiday.

FOREIGN BONDS

Universal Pictures Company Inc. earnings for the second quarter, ended May 6, are understood to have

ended May 6, are understood to have been 10 per cent above the first quarter.

Net for the first three months of the fiscal year, after charges and taxes, amounted to \$451,015, equivalent to \$1.43 a share on 250,000 shares of no par common, after preferred dividends.

For the year ended Nov. 7, 1925, net was \$1,925,506, or \$6.18 a share on common, compared with \$1,785,011, or \$5.62 a share in the previous year.

The program of Universal for the 1926-1927 year, now being produced and sold, will be the largest in the company's history. The cost is estimated at \$10,000,000, compared with between \$6,500,000 and \$7,000,000 last year. Plans call for the production of about 70 feature pictures, compared with 54 in 1925-1926.

Program includes six so-called super-specials. In addition to these feature pictures, the company is a large producer of one and two reel comedies and western films. Production, including all types of pictures, will amount to more than 200 films

BIG PROGRAM

OF UNIVERSAL

tion, including all types of pictures will amount to more than 200 films

Costly Super-Specials

Among the super-specials are "Uncle Tom's Cabin," costing \$600,000, on which \$210,000 already has been spent, "The Flaming Frontier," which has received a try-out on Broadway, "Les Miserables" and "Michael Strogoff."

received a try-out on Broadway, "Les Miserables" and "Michael Strogoff." The latter two were made by a French company, Universal obtaining the rights for the rest of the world outside of France. In 1925-1926 the company produced only one super-special, "The Phantom of the Opera."

The most expensive film turned out by Universal. "The Hunchback of Notre Dame," is still running in a number of foreign countries, and netting substantial receipts. This film was produced at a cost of \$1,241,000, and has returned rental receipts of about \$4,000,000 to date. It is estimated that the box office receipts of the picture range around \$40,000,000. "Foolish Wives," another large picture, was produced at a cost of \$1,120,000. Universal's foreign business has shown large expansion in recent years. Its growth this year will be about 15 per cent.

Agreement With Ufa

Agreement With Ufa Agreement With Ufa

No estimate has been made of the profits which may be expected to accrue to Universal as a result of the agreement made last fall with Ufa, the predominant German producing and exhibiting company, by which Universal, without the necessity of any expenditure, obtained the privilege of showing a number of its films in Ufa's chain of theaters throughout Germany. The revenue from this source is expected to be substantial.

Universal also expects to benefit

Universal also expects to benefit
materially by the expansion program
now being carried out by the Universal
Chain Theaters Corporation, in which
Universal Pictures owns a substantial
interest. In April 30 new houses were
added to the chain, bringing the total
up to 127, in addition to which 14
houses are under construction or ouses are under construction of projected.

It is believed that an announcemen

It is believed that an announcement will be made soon of the acquisition of additional chains as the result of negotiations now in progress. On April 3, last, Universal Chain was lending \$4,000,000 on call, which it is the intention of the company to use to acquire new units as opportunity offers.

the intention of the company to use to acquire new units as opportunity offers.

Net profits of Universal Chain Theaters for the 16 weeks ended April 3 totaled \$246,945, after charges but before federal taxes.

#### LOG OF THE STATE STREET TRUST CO. ARTISTIC BROCHURE

In an attractive brochure of 85 pages, bound in heavy cloth, the State Street Trust Company has issued its "log," containing pictures and a description of its colonial banking rooms, its ship models, quaint furnishings, rare prints of ships and views of the Boston of other days, as well as other New England towns.

There is included also a story of the "Lamp Shade Fleet," the story of the National Union Bank, lately merged with the State Street Trust, sketches of the company's staff and a chapter on the significance of State Street as a business center.

The present booklet is the latest of many that the trust company has pub-lished in the last 22 years relating to lished in the last 22 years relating to the history of New England, and which it is distributing to its depositors and others who, in the words of the bank, "may desire to know more about the objects which have, as we believe, contributed so much to make the bank attractive, homelike, and at the same time businesslike."

Interesting records of the National Union Bank, organized in 1792, photographs of old prints, and numerous illustrations add to the value of this "log," which makes a distinct contri-bution to the banking history of Boston.

#### VALUE OF AMERICAN TELEPHONE RIGHTS

phone stock issue appears financial satisticians at once unlimber their pencils and set about determining whether or not profitable arbitrage possibilities

The idea is to see whether American Telephone stock could be sold and advantageously replaced through the rights. Sometimes it is possible to do this at a profit, but a sizable spread does not exist for long, as the houses prepare tables of stock prices and prepare tables of stock prices and equivlents for the rights enabling them at a glance to tell whether a worth-while arbitrage opportunity is present. plicated and must give effect to in-terest, commissions, taxes, cost of rights, dividends "lost," etc. One such table prepared by a Boston investment house gives the equiva-lents by fluctuations of sixtenths in

the rights. The table covers a range of from 5½ to 6½ for the rights and

# "Orbray" Is the Word

for World Radiocast

Special to The Christian Science Monitor Denver, Colo., May 27 "ORBRAY," a newly-coined radio signal indicating the radiocasting of a round-the-world program, was flashed from Denver Wednesday evening as the preliminary to a program to advertise the opening, June 14, of the Rotary international convention in thi

The program will be radiocast to more than 25 countries, in which Rotary Club organizations memberships aggregating more than 150,000 persons have been informed in advance of its coming. These countries include Sweden, Denmark, Switzerland, Italy, South Africa, North and South America, Australia, and New Zealand, China, the Philippine Islands and the Malay Peninsula, etc.

The radiocast will be from the Rocky Mountain Station of the General Electric Company, KOA. The name "Orbray" was coined by Miss Ada C. Sessions of Colorado Springs, who participated in a contest inaugurated for the purpose.

ner concert: Eleanor Kaplan, violinist;

his orchestra.

## ELECTRIC CELL USED INSTEAD OF MICROPHONE

Phonograph Records Made by Novel Electric

Process

Previous to the introduction of the new phonographs, which, benefitting by radio audio developments, have been able to reproduce extremely low and high tones, steps were taken to improve the records themselves. It was evident that even though the reproducing machines were developed to the desired tonal point, this would be of no avail uness the record had the low and high

tones on them to reproduce.

Here again the art of electrical audio development came into play, and the electrically cut records were produced. Up to this time a record was made roughly as follows. A horn with a sound box almost identical with those on the phonograph itself was used, the needle being mechan-ically controlled to run on a disc of soft wax. All the energy necessarv to move the needle in the wax had to be developed by the actual

sound waves entering the horn. Now certain sounds, primarily those in the middle register, had more what we may call "needle cutting energy" than others with the results that the usual phonograph tone was produced. The logical course was then to control the various ranges of the tonal scale and reinforce the action of the needle so that the disc would have a true record of the sounds made by the artists

in the studio. Anyone at all familiar with radio equipment can see how this could be worked out. A microphone picks up the sound. This is converted into electrical energy which is sent through amplifiers. The needle is then operated by a magnet connected to the output of the audio amplifier. The energy in this amplifier can be made large enough so that it will overcome the resistance of the wax

when the needle is cutting.

A finely defined tone groove is thus produced giving the essential low tones and high tones with the necessary harmonics for fidelity of reproduction. These records are so good that when played even on the old type of phonograph with its com-paratively unresponsive diaphrazm a vast improvement in tone quality is noticed. When played on the new machines the result is nearly perfect.

A more recent development in electrical pick-up and amplification is the photo-electric cell which has been adopted by the Brunswick people for making records in their studios. The microphone is not used in this method. A beam of light which comes from a brilliant fila-ment is reflected on a photo-electric cell from a tiny mirror. This mirror in turn is mounted on the back of a small cone. This cone is very responsive to sound waves and is made of aluminum weighing but 2-100 of a milligram.

When the speaker sings or the orchestra plays, or both, the cone is energized by the sound waves in the studio. This causes the small mirror to vibrate and the team from the light is then varied as it plays on the photo-electric cell. From this point on the usual am-WJJD, Mooseheart, Ill. (303 Meters)
4:30 p. m.—Dinner concert; Jack Nelson; Howard L. Peterson playing Geneval phone and it is said that Station WGY, noted for its good quality, is using one of these in its studio transmissions.

## "CANNED HEAT" CONDEMNED CALGARY, Alta., May 17 (Special Correspondence)-That the sale of

"canned heat" should be prohibited and that it should be under the bar through the legislation of the Alberta Liquor Control Act was the opinion expressed to an official of the liquor enforcement branch re cently by Col. G. E. Sanders, magistrate in the police court here. On that occasion Col. Sanders had on his docket several cases of drunk enness due to the drinking of "canned heat" and he strongly condemned the practice of selling this article which the wood alcohol is exfrom which the wood account is ex-WHITE HOUSE on beautiful South River; modern, refined; bathing; abundance home-grown vegetables; also three near-by cottages for rent. MRS L. W. KRAPISH, Riva, A. A. County, Maryland. wax-like contents of the tins which the canned heat is sold.

RANCHING IN THE FAR NORTH EDMONTON, Alta., May 17 (Specia) Correspondence)-Canada's farthest north ranching district will be estab lished this summer in the Fort Fitz rald country, 600 miles north of Edmonton, as a large shipment of cattle is to be forwarded to this district in the near future. It has been proven that this district is suitable for live-stock raising and also is exlent for farming purposes alough it is situated on the extreme thern limit of the Province. The hipment of cattle will be forwarded by train to the end of steel at Waterways and will travel the remainder of the journey by boats up the Atha-basca River.

## **EDITORIALS**

As was to have been expected, those who seek to condemn President Coolidge's recent execu-

Let Us Try the Order First

tive order authorizing police officers in the states to act as prohibition agents are to attack it upon the ground of its alleged unconstitutionality. The assault indicates conclusively enough to those who sympatheti-

cally defend the order the need that existed for its promulgation. The unanimous vote by which the United States Senate ordered an inquiry by its Judiciary Committee into the legality of the order should not be taken as an indication that there was unanimous agreement among the senators that it should be reversed or countermanded. It is a much safer assumption that the President's friends who assented to such an inquiry are absolutely confident that the order cannot be successfully attacked.

It is not to be wondered at that every device to which the foes of prohibition can resort will be employed to make it appear that the President acted unwisely, or in excess of his constitutional powers, in thus providing a new and powerful weapon in aid of the federal enforcement unit. The nullificationists have made their boasts that in those sections of the country where violations of the law have been most frequent and most persistent, these have been made possible in a large measure by the ability of bootleggers and rumrunners to corrupt, intimidate, or outnumber the officers authorized to enforce the law. Bribery has been practiced openly, though it is not intimated that even a majority of those pledged to compel obedience to the law have yielded to the temptations placed before them, and intimidation and violence have paved the way for shocking and almost unbelievable violations of the law. It is conceivable that if there should be a general response to the President's implied invitation to peace officers throughout the United States to enlist as enforcement agents invested with federal authority, the plotters against the law will discover that many of their carefully devised plans have been upset. They will find it difficult, no doubt, to adjust their unwieldy machinery so as to insure immunity from surprise or attack at points which they have heretofore been able to safe-

The confidence which friends of the Administration in the Senate feel in the integrity and soundness of the executive order may reasonably be based upon the presumption that President Coolidge, before he decided to promulgate it, had satisfied himself of its absolute legality. His Attorney-General, Mr. Sargent, has announced his conclusion that the ruling is constitutional. That, after all has been said, would be the only ground upon which it could be successfully attacked. As to its wisdom and propriety, neither the Senate nor the public can be the final judge. On these points, the President assumes, quite properly, the discretionary power invested in him by the Constitution. Next week. or next year, should he deem it wise, he could, by the exercise of the same power, rescind, revise, annul or countermand the order, and his right in so doing could no more reasonably be questioned than can his discretion in the present

In justification for the step taken in the effort to reach those offenders who have successfully evaded prosecution, it may again be recalled that It was the enemies of the Volstead Law who succeeded in affirmatively showing during the recent hearings in Washington that the law is being openly and flagrantly violated. They insisted that anything approaching complete enforcement would never be possible. The President's answer is that it will be made possible if the combined authority of the states and the Federal Government can make it so.

It was upon the urgent request from the Federal Prohibition Administrator for California, apparently, that the President finally decided to take the important step in an effort to coordinate state and federal power. It was shown that persistent violations of the law in one California county were being carried on against the ineffective protests of the citizens of the adjoining county. The dividing line served to render abortive the efforts of state sheriffs and constables to put a stop to abuses which had become offensive. This federal official asked that the restrictions which prevented state and county officers from serving the Federal Government in such an emergency be removed. This the President found possible and desirable. The specific condition which it was sought to meet is duplicated, however, in hundreds, and possibly thousands, of other places throughout the

Surely the experiment, if so it may be called, should be tried before the plan is condemned by the friends of law and order. Accepting the estimate of the foes of the law that the federal enforcement machinery is inefficient, it has been decided to fortify it with an army of minutemen whose numbers and strength the nullification forces will not be able even to estimate. No wonder they are seeking means to avert what promises to bring confusion and disaster to their ranks. Thus they appeal, in their extremity, to the very Constitution whose provisions they have undertaken to nullify.

What probably will be the last chapter in a somewhat persistent legal controversy was writ-

Legalizing the Color Zones

ten in the United States Supreme Court a few days ago when a decision was entered which explicitly upholds the right of individuals, by indenture, to agree that real estate owned by them shall not, for a

term of years prescribed, be sold to persons of a particular race or color. The controversy arose, in this instance, when one so pledged undertook to convey by deed a dwelling to a person alleged to be of Negro blood. Both the owner and the prospective purchaser were made defendants, and they joined, after an adverse decision in the District Supreme Court in Wash-

ington, which was sustained by the Court of Appeals, in carrying the matter to the highest court on what was alleged to be a constitutional

The opinion finally rendered, which was by Mr. Justice Sanford, holds that no constitutional question is involved, and therefore that the case must be dismissed. But the learned jurist took occasion to deal, in his discussion of the merits of the controversy, with the legal status of the parties and their rights. There remained no doubt, as he put it, that individuals may, by such an agreement as that entered into, restrict the right of those thus contracting and bind themselves not to part with their title except under certain conditions. After discussing briefly the constitutional provisions cited by the appellants, the court continued:

It is obvious that none of these amendments prohibit private individuals from entering into contracts respect-ing the control and disposition of their own property; and there is no color whatever for the contention that they render the indenture void. And, plainly, the claim urged in this court that they were to be looked to in connection with the provisions of the revised statutes and the decisions of the courts in determining the contention earnestly pressed that the indenture is void as "against public policy" does not involve a constitutional question within the meaning of the code provision.

Quite naturally, because the problem of race segregation is one which many American cities have sought a way of solving, the case just decided has attracted wide attention. Its conclusion, while perhaps technically countenancing as legal only bona fide agreements entered into by individual property owners to prohibit sales except under certain conditions, no doubt will encourage attempts to prescribe segregation laws in those cities where Negro tenants and owners have persisted in invading neighborhoods where they are not welcomed by the whites. It has been shown, as conclusively to the members of one race as to those of another, that unhappy results follow every attempt to permit or compel a social admixture of the Negroes and whites in residential areas. No argument is needed to convince the fair-minded Negro of this fact.

If lay opinion should be asked to support the judicial opinion just rendered, it might reasonably and logically be insisted that while the decision may seem to place a restriction upon what was assumed to be a right of the men bers of the Negro race in this particular instance, it actually assures to them a privilege equal to that which seems to be reserved to the whites. In fact, they are permitted, by the same method, to restrict their own neighborhoods and to compel, if they choose, that segregation which the right implies.

In discussing the war debt of Greece the other day our neighbor, the Boston Herald, fell into

Facts

Concerning

the

Greek Loan

certain errors of statement which deserve correction. It rightly says "there should be no difference of opinion regarding facts." But if an error is cited as a fact. difference of opinion is inevitable.

During the war the United States agreed to lend Greece \$50,000,000. Only about \$15,000,000 was in fact advanced. The Herald says, "The purposes for which it [the loan] was available were not fulfilled." But this statement is incorrect. The facts are as follows:

1. The loan was agreed upon for the purpose of enabling Greece to carry out certain military and naval operations in 1918, in accordance with the wishes of the interallied high com-

Greece carried out these operations and as provided in the agreement itself, Greece financed them by an issue of paper currency, to be redeemed when the American loan became avail-

3. All expenditures were carefully supervised and certified by an interallied finance commission on which the United States was represented, its representative being for a large part of the time chairman of the commission. This representative certified that the purposes of the loan had been fulfilled.

4. The amount mentioned, \$48,236,269, is the exact amount for which approved vouchers were submitted by the commission and for which the Treasury of the United States accepted the obligations of the Greek Government, which are still held in the vaults of the Treasury of the United States.

5. The agreement provided that the entire amount would be paid to Greece six months after the conclusion of peace between the United States and the countries with which it was at war.

The Herald is still further in error when it deprecates the idea that this moral obligation of the United States should be fulfilled in order that Greece might be aided in caring for the refugees driven to her shores by Turkish barbarity. "The refugees have became helpers," it says. But they have fallen far short of being self-supporting, and will be a drain on public and private charity for many years. What Greece has done and is doing to meet this burden makes her deserve better things at the hands of the United States than the repudiation of a specific agreement the conditions of which have been fulfilled by the Greek Government.

The establishment of a "league of friendship" between the nations of the world has

been an ideal long cherished in the hearts of leaders of mankind. Always this vision has sprung out of a sincere desire to attain greater peace and prosperity in the world, associated with the understanding

A League of Friendship

that resort to the sword and bayonet is an oldfashioned idea that is fast falling into disrepute. In recent years, the feasibility of building up a genuine league of friendship is gaining a greater hold than ever upon the consciousness of thinking men and women, who see in its promotion an opportunity to serve unselfishly the cause of humanity.

Gradually the thought of the world has been broadening and working up to a plane of greater understanding and good fellowship. The advent of the airship, the radio, and other

wonders of the age has cut down to a large extent many of the limitations placed upon time and distance. The huge ocean liners, plying to and fro from one continent to another, are carrying with them athletes from all sections of the globe to compete in international contests between nations heretofore in many cases estranged. The great influx of foreign athletes into the United States in recent years, the Olympic Games, the interchanges of sporting as well as social relations between the English and American universities, the international chess tournaments and boat races; all these are aiding measurably in building up a "league of friendship" between the nations of the world.

Friendship is regarded as a step, and a big one, on the road to true fellowship and brotherhood between individuals; then why not also between nations? Practically everyone is more or less interested in some form or branch of sports. Apparently the love for friendly competition is equally common to all types and classes. Direct communication between the peoples of different countries is becoming easier. The door is opening wide to more of these international contests, to more of these meetings between the peoples of various nations on friendly grounds for friendly purposes. The possibilities in the field of sport for establishing international good will appear unlimited. Sports furnish a channel through which may flow peacefully the natural competitive instincts of nations in a way that will react beneficially upon the whole world. Indeed, it is apparent at this time that sports will play a constantly increasing part in the furtherance of an international "league of friendship."

There have been but few more picturesque incidents, appealing to the imagination of a

Back After

Twenty-One

Weeks.

people, than the experiences which Mellie Dunham and "Gram" have enjoyed during the last several months. since the eventful day when he received the letter of invitation from Henry Ford to come to

Detroit for a short spell as the motor manufacturer's guest. And now he is back home, and glad to be back. It falls to the lot of but few to live as uneventful a life as this fiddler of Maine has done, and in the twilight of his years suddenly to find himself in another world, concerning which he knew but little and expected to know personally nothing whatever.

But he is back home, and glad to be back. And who would not be under similar circumstances? His five months have been so full of wonderful happenings that he probably hardly realizes yet that he has not been dreaming, and possibly he half expects to wake up soon to find himself still the unknown worker making snowshoes and fiddling for diversion. The homecoming, too, was not a merely perfunctory affair, but a fitting climax to nearly half a year's travel in numerous states. For though Norway, Me., is a quiet neighborhood, and its local celebrations have traditionally been simple, the celebration arranged on this occasion as a welcome to its two honored townsfolk exceeded anything that it had ever known before.

And there is a lesson in all this. Not that it matters in reality that an obscure old man has been suddenly transported from his accustomed environment and surrounded with luxuries that he scarcely knew existed. That in itself may indeed be of doubtful value to either himself or his immediate kin. But the same people which took Mellie to its heart and made much of him has its arms ever open for merit in any direction. The democratic sense of the United States responded in a way to touch the imagination in this instance. In the case of Calvin Coolidge it responded in another but in just as heartening a manner. The people of America like to see someone born of lowly parents rise to high estate. The appeal is based upon the ability to do something better than anyonc else. Whether in statesmanship or the humble field of fiddling, merit is given a chance to reap its

## Editorial Notes

It is said that the footprints of an animal with eight legs and sixteen toes have been discovered in the strata of rocks in the Grand Canyon, Arizona, and considerable surprise has been expressed at the possibility of the existence of such an octoped even in the days of the extremely remote past. While the find is said to "challenge credulity," it is apparently vouched for by representatives of the Department of the Interior, co-operating with the curator of vertebrate paleontology, United States National Museum. But why should it arouse comment or astonishment, for is there not today the centipede? And speaking of centipedes, maybe some have never heard of the following chapter in this insect's history:

The centipede was happy quite Until the toad for fun Said, "Which leg follows after which?" This stirred him up to such a pitch, He lay distracted in a ditch, Considering how to run.

Perhaps the inside story of the final extinction of the eight-legged creature above mentioned would also contain the report of some such in-

When Webster and the public disagree, who shall decide? That was the question which some might have asked at the gathering at the Twentieth Century Club, in Boston, the other night, when sixteen selected and yet common words, put as an intelligence test before those present, disclosed there was nothing like unanimity regarding their correct pronunciation. Moreover, Prof. John L. Lowes of the English department at Harvard agreed with the public sometimes and with Webster at others. "Tomato" was one interesting word concerning which there was so much difference of opinion that it was put to a test vote. Of those taking part, it is reported, twenty-six favored tomato with a short "a," while twenty-one favored it with a long "a." The other words included, "Aaron," "ally," "automobile," "cordial," "escapade," "halibut," "indisputable" and "squalor."

## On the Night That Peking Was Bombarded

was the sullen boom of cannon firing. Chang Tso-lin's advance artillery had reached Huangtsun in the "big push" against Peking, and was tearing up the trenches there of the capital's Kuominchun defenders. A night attack had opened.

The dancing did not stop when that first "boom-m!" was heard. Perhaps an occasional step may have been missed by some young Chinese student, just home from America and arrayed in a new dinner suit whose trousers bag like a skirt. And perhaps a few at the surrounding tables may have given a quick gasp as they heard the

But the dancing went on. A spade-bearded diplomatist -an Austrian, maybe, or a Rumanian-shrugged a shoulder by way of assurance to his fair partner. Young secretaries of legation smiled knowing smiles which might, without words, intimate to their companions—sometimes young Chinese girls-that, after all, they knew! Had they not their dispatches from agents at Tientsin? But come, the music calls!

There were exclamations in French, in German, in Italian, in Portuguese, as well as in English-New York and London varieties—for the hotel ballroom is nightly filled with an assemblage most cosmopolitan. But the dancing

I tried desperately to shove Byron out of the picture. where he seems to belong nowadays. But he wouldn't go. He kept running through my head to the rhythm of the

There was a sound of revelry by night, And Belgium's capital had gathered then Her Beauty and her Chivalry, and bright The lamps shone o'er fair women and brave men; A thousand hearts beat happily; and when Music arose with its voluptuous swell, Soft eyes look'd love to eyes which spake again, and all went merry as a marriage bell:— And all went merry as a marriage bell;— But hush! hark! a deep sound strikes like a rising knell!

It was, indeed, "the cannon's opening roar," but there was no "hurrying to and fro," nor was there any "mounting in hot haste."

4 4 4 Instead, some of the guests took elevators and went on to the roof-the highest in Peking, all of six floors up. And from that vantage point, because the night was dark and because there is no "gay white way" in Kublai Khan's city to obstruct the far view, they were enabled to see a battle in progress. It would make any dancing party a

Over a sweep of perhaps two miles, at a distance that seemed less than the eleven miles it is accredited to be, they could see short, sharp tongues of flame darting out from the mouths of unseen artillery pieces. They

like sudden spurts of flame from a distant grass fire. And

They danced last night at the Grand Hotel de Pékin, as they do every night. But the music of the French jazz artists had an unwonted ground-tone, as if a deep-pitched and muffled drum were hidden behind the grand piano. It But the jazz still pulsated below, and up on the roof the night was a bit chill, despite the fact of spring.

As the night went on, the firing continued. There was hardly a consecutive full minute without the booming noise and the fire flashes from some part of the two-mile

barrage. Dancers returned to watch again.

Directly below, on the broad road by the Legation Quarter wall, the sights of normal nocturnal Peking were reassuringly visible. A fareless 'riksha puller walked slowly along, his shafts up, whistling. Motors were parked, awaiting their owners at the dance. Soldiers strolled slowly up and down in midroad, a few of the thousands who keep order in the ancient capital, their bayonets, always fixed, flashing in the light of a passing motorcar.

Food sellers stood beside their little shops—flat-topped carts like those of curb merchants in New York's East Side. A door porter at the hotel's entrance kept order among quarreling 'riksha men-and did so in the genial fashion they have in China, with a long-lashed whip. At the gate to the Legation Quarter, just opposite, foreign guards watched from the battlements, martial silhouettes against the lights behind.

Yes, the night outlook was normal—all save the flashes of those distant guns. The night sounds were normal-all save the menacing boom.

And today? This morning, as I lay long abed in Sabbath ease, I listened to the noise made by one of those curious orchestras which Chinese bring into their homes on occasions of mourning. The players were in a compound just beyond the walls of my own. A thin-bodied drum, a hautboy, a Manchu lute, a bell and cymbals. Weird, monotonous music they gave forth. Birds, swinging precariously on

willow boughs, were startled into silence. From outside came the daytime noises of Peking. Street peddlers, passing by, shouted their ages-old calls, disregardful of the funereal music. I heard the voices of children at play, some of them singing lovely little songs whose

melodies I wish I could remember. But even now, the distant boom of the guns is still audible, and as I emerge from my garden bedroom I hear the swift putter-putter of an airplane. For the first time in a week our morning air-raider has come again to drop his bombs of terror upon the frightened people of Peking.

There is a note of incredibility about it. The loud lamentation in the neighboring compound, the voices of playing children, the cries of placid street merchants, the bell of a near-by temple—and there, overhead, the drumming of an aerial motor, the crashing of exploding bombs and, in the distance, the constant, regular booming of bombarding guns.

In the interval one is blindingly conscious of a brilliant springtime sun. Two magpies parade pompously across the garden.

## The World's Great Capitals: The Week in London

The best that can be recorded in regard to the sorry business of the strike, is that the British determination to make the most of a bad situation was unchanged throughout the entire week or more. Whatever may have happened elsewhere, the average Londoner retained his sang-froid and went upon his business, handicapped though he may have been, with a freedom from agitation, a composure and coolness that recalled some of the dark days of the war. His disposition plainly was to "carry on," as well as to blunder through, and so in this crisis the plain citizen's morale remained unimpaired. He got to his shop or office as best he could-on shanks' mare, pushcycles, or roller skates, if motorcars or busses were not handy-and "kept on smiling." Some pedestrians who had miles to walk from home to business had placards on their hats with printed letters reading: "Piccadilly, please!" or "Let me off at Oxford Circus," and seldom were these ingenious advertisers denied a lift by more fortunate motor owners speeding cityward.

The chimney sweeps in London had their annual celebration of May Fair on the first of the month. According to a legend connected with this fair, a mother, searching for her kidnaped boy many years ago, recognized him at the sweeps' May Fair in West London. Boys in those days had to climb up chimneys to clean them, and the abuse was not stopped until comparatively recent times. Overjoyed at finding her boy, the happy mother provided money for a yearly feast of sweets, and the old custom is maintained to this day. At this year's celebration there were present representatives of the Rowles family, who have been sweeps in an unbroken line for more than 200 years and still follow the business at Sunbury-on-Thames, Isleworth, Hounslow, and Finchley. . + +

A theological foot race is in prospect as a result of unexpected running prowess displayed by the new Bishop of Southwell, the Rt. Rev. B. O. F. Heywood. Soon after his elevation to the bishopric, the bishop found himself at a railroad station with exactly ten minutes to make a connection at another station a mile away. No cab being available, the bishop, bag in one hand and umbrella in the other, sprinted and caught his train with a minute to spare. Now he has challenged the archdeacons of his diocese to a race. It is reported that the Archdeacon of Newark wants to accept, but his wife won't let him. The Archdeacon of Nottingham has accepted, provided he is allowed to make a collection of diocesan funds on his way. The Archdeacon of Derby has remained silent so far, but his friends expect him to prove the dark horse of the race. + + +

The Mansion House is the official home of the Lord Mayor of London. There is some talk of its being rebuilt, the present rather dull and ugly building being now nearly 200 years old, as it dates from 1739. Its interior decoration is massive and ornate, and costs a large sum yearly to keep clean looking and in repair. Accommodation that was ample in its early days is now totally inadequate, and although only used by each Lord Mayor for a year, for most of them the change from their private residence must be hard to endure. As so much is going on in the building line in the City, it would seem that an up-to-date Mansion House, properly equipped with banqueting halls, committee rooms, board rooms, lifts, and comfortable dwelling quarters above for London's chief magistrate, is not asking anything out of reason. + + +

"Bobbed-hair bobbies" is the name given to the policewomen of London, following the discovery that the lure of the shingled head has proved so irresistible that more than half of the women on London's police force are patrolling their beats in abbreviated locks. "There is no official ruling as to the length of a policewoman's hair, and probably more than half of the policewomen in London wear theirs short," says an official of the Women's Auxiliary Service. It is also announced that the first bobbed May Queen was crowned at Knutsford, in Cheshire, on May Day. The May Day committee had great difficulty in finding a girl with long hair, and finally gave up the search. Of the eight aspirants for the honor of May Queen, only one had what has hitherto been considered the queen's chief qualification. 4 4 4

At Woodford Green, in Essex, not very far from London, there has existed from time immemorial an old type country smithy. After fighting against the gradual onslaught of the motor for the last twenty-five years this old smithy has now been closed. It will doubtless soon be pulled down for the ground to be built over. Originally it stood on the Green midway between the eastern and western bound-

London . aries. Then encroachments began. A row of houses sprang up first, and then a row of shops, so that the little smithy was almost shut in and horses were being shod between the pavement of the roadway and the forge. This might have gone on if it had not been for a dearth of horses requiring shoeing. A garage came into business near by, and now the old forge has gone out of business.

This week's sayings: The cultured American is the only remaining defender of pure English speech.—Basil Sydney.

Just as duelling was stopped by public opinion, so, when

we are really resolved to stop war, war will cease.-Lord

It has always been recognized as one of the great advantages of indirect taxation that it is open to the taxpayer to say whether he will contribute to the state or refrain from that particular form of indulgence.—Ronald

In spite of its limitations, this old country is the freest country in the world, and in spite of its faults, it is the sweetest country in the world.—Sir R. Horne. I shall pick up the bits. I shall start again .- Stanley

No worker can be happy unless his work is growing and he is growing with it.—Bishop of Liverpool, the Rt. Rev. A. A. David.

Those "Insuperable" Bars to Disarmament To the Editor of THE CHRISTIAN SCIENCE MONITOR:

Calmly contemplating the stupendous burden piled by the late war on a "suffering sad humanity," one is led to hope that the coming disarmament conference may find some safe and sane specific for war's insanity. The burden referred to includes the increase of national debts the world over from \$40,000,000,000 to \$400,000,000,000.

Confronted with this and kindred problems, the militarists gravely shake their heads and aver that "what has been shall be," that "you cannot change human na-ture," that race hatred, diversity of language, and so forth, make war inevitable.

That human nature can have even its pugnacity regulated, let the abolition of dueling witness! That diversity of language need not compel war is

easily proved by reference to the neutrality in the last var of the tri-lingual Swiss Republic, with its French, German or Italian-speaking citizens. That ancient race hatred may be wholly overcome, our

neighbor Canada furnishes a conclusive example. England and France were actually at war 277 years between A.D. 1171 and 1815. A well-known quatrain describes the

For centuries two neighbors fought, John Bull and Johnny Crapaud. Just because the Frenchman would Call his hat a "chapeau."

Today in Quebec or Montreal one can enter a store and ask for "hat" or "chapeau," as he feels disposed. No one takes any offense, and the price is just the same. For at least two centuries Englishmen and Frenchmen have jointly occupied and governed Canada. Sir Wilfrid Laurier or Sir John Macdonald may be rivals, or in turn serve as Premiers of Parliament, wholly without popular clamor or hint of racial war; for side by side live descendants of John Bull and Johnny Crapaud in entire harmony and

Self-seeking politicians and war profiteers are the real irreconcilables and opponents of disarmament. E. B. Pacific Grove, Calif.

The Consumption of Liquor in Switzerland To the Editor of THE CHRISTIAN SCIENCE MONITOR:

Regarding the assertion made by some wets in the United States that the sale of light wines and beer would stop, or at least diminish, the consumption of liquor, may I state that in Switzerland, where wines and beers, light and otherwise, are freely sold at present, stills are busily at work, peasants in many cases distilling their own fruit. Indeed, the consumption of liquor per head stands at figure which I as a Swiss hesitate in naming, having gone

a figure which I as a Swiss hesitate in naming, having gone up again appreciably since 1912.

Earnest efforts are now being made to remedy what seems to be an appalling situation, but it would be hard to convince Swiss people that the sale of wine and beer helps to check the flow of liquor.

L. C.

Neuchâtel, Switzerland.
